Electrical & Computer Eng. Courses

Courses

EE 5095. Graduate Seminar.
Graduate Seminar (1-0) Conferences and discussions of various topics in electrical and computer engineering by faculty, students, and speakers from industry and other institutions. Restricted to majors: EE, EECE.

Department: Electrical & Computer Eng.
0 Credit Hours
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

Classification Restrictions:
Restricted to majors: EE, EECE.

EE 5106. Research Methods II.
Research Methods II (1-0) Study and development of research questions. Students will produce and defend written research proposal in field of interest in engineering. Restricted to majors: EE, EECE. Prerequisite: EE 5205 with a grade of "B" or better.

Department: Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 5118. Laboratory for EE 5318.
EE 5118: Laboratory for EE 5318 Simulation, fabrication, and testing of MOS technology. Includes silicon oxidation, lithography, etching, thin film deposition, diffusion, and process integration. Corequisite: EE 5318 Prerequisite: EE 3329 with a grade of "C" or better.

Department: Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3329 w/C or better)

Corequisite(s): EE 5318

EE 5190. Special Topics Lab in ECE.
Special Topics Lab in ECE Laboratory study of a selected topic in Electrical and Computer Engineering.

Department: Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR
EE 5191. Individual Studies.
Individual Studies (0-0-1) Individual variable-credit research, design or analysis on advanced phases of electrical engineering problems conducted under the direct supervision of a faculty member. A maximum of 3 credit hours may be applied towards the M.S. degree.
**Department:** Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour
**Classification Restrictions:**
Restricted to class of DR

EE 5192. Clinical Rotations-Engineers.
This course facilitates the recognition of the importance of designing medical devices and biologics with the end-user in mind. Each rotation will include background in terms of theory and clinical application provided by a physician, including selected case studies, followed by "hands-on" experience (whenever possible) with technical personnel. Clinical rotations will be at the Foster School of Medicine, the William Beaumont Army Medical Center, and the US- Mexico Border Health Association. Prerequisites: Department approval; BIOL 6304; DRSC 5495; and MASE 6321 OR EE 6321 OR MME 5312 OR EE 5321 with a grade of C or better. Restricted to level of DR, GR.
**Department:** Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 5194. Graduate Research.
Graduate Research (0-0-1) Individual variable credit research in electrical or computer engineering. Cannot be used to satisfy minimum degree requirements. Grade of P or F. Restricted to majors: EE, COMP ENGR. Prerequisites: Graduate standing and department approval.
**Department:** Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour
**Classification Restrictions:**
Restricted to class of DR

EE 5195. Graduate Seminar.
Graduate Seminar (1-0) Conferences and discussions of various topics in Electrical and Computer Engineering by faculty, graduate students, and speakers from industry and other institutions. Required once of all Master students prior to graduation. Students are required to attend a certain number of University professional related lectures, as specified by the instructor. Grade of P or F. Restricted to majors: EE, COMP, ENGR.
**Department:** Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
**Classification Restrictions:**
Restricted to class of DR

EE 5197. Medical Device Practicum.
The use of structured techniques for client needs identification will be taught. Student teams will follow a structured process for the concept generation design of a biomedical device. Students will consult experts, perform patent searches, and conduct competitive benchmarking as part of external searches for solutions. Prerequisites: Department approval; MASE 6192 and MASE 6327 with a grade of C or better. Restricted to level of DR, GR.
**Department:** Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
**Classification Restrictions:**
Restricted to class of DR
EE 5205. Research Methods I.
Research Methods I (2-0) Introduction to the techniques, tools, and skills needed to conduct, evaluate, document, and disseminate research in engineering. Restricted to majors: EE, EECE.
Department: Electrical & Computer Eng.
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5291. Individual Studies.
Individual variable-credit research, design or analysis on advanced phases of electrical engineering problems conducted under the direct supervision of a faculty member. A maximum of three credit hours may be applied towards the M.S. degree.
Department: Electrical & Computer Eng.
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5294. Graduate Research.
Graduate Research (0-0-2) Individual variable credit research in electrical or computer engineering. Cannot be used to satisfy minimum degree requirements. Grade of P or F. Restricted to major: EE and COMP ENGR. Prerequisite: Department approval.
Department: Electrical & Computer Eng.
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours
Classification Restrictions:
Restricted to class of DR

Probability and Random Processes (3-0) Random process fundamentals, including spectral analysis, special classes of random processes, linear systems response to random processes, and applications.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3384 w/C or better ) OR (EE 3484 w/C or better ) OR (STAT 3330 w/C or better)
EE 5301. Computational Methods for EE.
Computational Methods for Electrical Engineers (3-0) A broad coverage of the field of numerical methods emphasizing computer techniques as they apply to Electrical Engineering. Topics generally include numerical integration and differentiation, boundary-value and eigenvalue-value problems, finite-difference and finite-elements methods, and solutions to partial, parabolic and hyperbolic differential equations.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (MATH 2326 w/C or better)

EE 5302. Linear Systems Analysis.
Linear Systems Analysis (3-0) The analysis of generalized linear systems through a state space approach. Relationships with frequency domain design. Modeling of physical systems. Controllability, observability, pole placement, and design of controllers and observers. Eigenstructures. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CE, CEPH, EE

Classification Restrictions:
Restricted to class of DR

EE 5303. EM Analysis Using FDTD.
A course on the finite-difference time-domain method for rigorous analysis of electromagnetic devices. The course covers the detailed formulation and how to implement the method in MATLAB. Topics include MATLAB, data visualization, finite-differences, Yee algorithm, perfectly matched layer absorbing boundary condition, sources, Fourier transforms, and modeling of electromagnetic devices.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (MATH 2313 w/C or better AND MATH 2326 w/C or better ) AND (EE 3321 w/C or better)

EE 5306. Antenna Theory.
Antenna Theory (3-0) Fundamental theory of point sources; the antenna as an aperture; methods of analyzing and calculating characteristics of various types of antennas; self and mutual impedances of antennas; array of linear antennas; antenna measurement techniques. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3321.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3321 w/C or better)
EE 5307. Modern Control Theory I.
Modern Control Theory I (3-0) Optimization theory and computer programming problems. Hamiltonian and LaGrange multipliers. Pontrygin's theory and dynamic programming. Lyapunov's method of steepest descent. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 5302, or EE 4364 or MECH 4311.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Computer Graphics (3-0) Advanced topics in two and three dimensional graphical techniques. Topics may vary, but course may not be repeated for credit. Restricted to majors: EE, COMP ENGR, CS, GRAD COMP ENGR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5311. Semiconductor Device Physics.
Semiconductor Device Physics (3-0) Advanced semiconductor principles and device building blocks, and their application to electronic devices. Topics include energy bands and gap, carrier statistics and transport, junctions and interfaces, and electronic devices. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3329 or equivalent with C or better.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 3329 w/C or better)

EE 5312. Advanced Optoelectronic Device.
Advanced Optoelectronic Device (3-0) Theory and application of advanced photonic device including injection lasers, photodiodes, infra-red detectors, solar cells, electroluminescent displays.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 5311 w/C or better)
EE 5313. Modern Semiconductor Devices.
Study of modern electronic devices that exploit functional properties of matter and advances in modern technologies. Devices covered include transistors, diodes and other modern devices. Prerequisite: EE 5311 w/C or better. Corequisite: Department approval required.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 5311 w/C or better)

Ultrafast Electron Devices For Supercomputers (3-0) Theory and applications of electron devices used in fast computers including high electron mobility transistors, optical logic gates, quantum well lasers, Josephson junction logic gates and heterojunction bipolar transistors. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite ("C" or better): EE 4350.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5315. Advanced Electromagnetic Theor.
Advanced Electromagnetic Theory (3-0) Theorems and concepts of uniqueness, equivalence, induction, reciprocity, and Green's functions. Application of plane, cylindrical, and spherical wave functions to resonators, waveguide, radiators, apertures and scatterers. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3321.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

EE 5316. Active Circuit Analysis.
Active Circuits Analysis (3-0) Analysis of active networks, network sensitivity, filter synthesis and design, and immittance simulation. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisites ("C" or better): EE 3340 and EE 4341.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
EE 5317. Linear Integrated Circuit Appl.
Linear Integrated Circuit Application (3-0) Techniques of analysis and design of electronic circuits, using operational amplifiers, and linear integrated circuits such as multipliers, logarithmic amplifiers and RC active filters. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3340.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Major Restrictions:**
Restricted to majors of CEPH, EE, EECE

EE 5318: Electronic Materials Processing (3-0) The science and technology of integrated device/circuit fabrication including the effect of defects. Includes silicon oxidation, lithography, etching, thin film deposition, diffusion, and ion implantation. Corequisite: EE 5118 Prerequisite: EE 3329 with a grade of "C" or better.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 3329 w/C or better)

**Corequisite(s):** EE 5118

EE 5319. RF Circuit Design.
RF Circuit Design (3-0) Resonant circuits and impedance transformation. Small signal high-frequency amplifiers. Sine Wave oscillators and phase lock loops. Mixers, AM, FM, and PM receivers and transmitters. Tuned power amplifiers. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3340 and EE 4341.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Major Restrictions:**
Restricted to majors of CEPH, EE, EECE

EE 5320. Nanoelectronics.
Review of quantum mechanics of free and confined electrons including quantum wells, wires and dots. Study of modern electronic devices that possess dimensions at which the quantum mechanical behavior of matter is manifested including devices with single-, few- and many-electron phenomena.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 5311 w/B or better)
EE 5321. BME for Global Health.
Graduate level course that provides an overview of the role of engineering technological advances to improve human health. The following points will be emphasized throughout the semester: What are the challenges in healthcare delivery in remote locations; How are we paying for healthcare delivery? What is the role of engineering to solve healthcare problems; and how do new healthcare technologies move from the lab to the bedside. Prerequisite: Department approval. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5322. 21st Century Electromagnetics.
A comprehensive study of the most advanced concepts in modern electromagnetics. Topics include dispersive and anisotropic materials, transmission lines, coupled-mode theory, periodic electromagnetic structures, gratings, guided-mode resonance, metamaterials, photonic crystals, transformation optics, spatially variant lattices, frequency selective surfaces, surfaces waves, and slow waves. Problems associated with interfacing CAD and MATLAB are also covered.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 5320 w/B or better)

Advanced Digital Communications (3-0) Source coding, generation, transmission, and detection of digital baseband and bandpass signals, optimum receivers, block and convolutional channel coding, adaptive equalization, encryption and decryption, and introduction to spread spectrum. Restricted to majors: EE, COMP ENGR, GRAD COMP ENGR. Prerequisite: EE 3384.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 3384 w/C or better)

EE 5324. Stat Infer for Signal Analysis.
Statistical Inference for Signal Analytics: Graduate-level introduction to the principles of statistical inference using probabilistic models in signal and information processing. The material in this course constitutes a common foundation for work in signal processing, statistical learning, pattern recognition, computer vision, control, and communication. Examples from these areas and current research trends will be discussed.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 5300 w/B or better)
EE 5325. Telemedicine & Imaging Informa.
This course focuses on applications of point-of-care diagnostics for chronic disease management. It also introduces basic concepts in telemedicine. Students will gain the knowledge, understanding and practical preparation needed to implement a program to diagnose and treat patients in remote areas. Prerequisite: Department approval. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 5326. BME Dev Design & Regulation.
This course introduces the regulatory requirements for the design, testing, and clinical implementation of medical devices and biologics. The first part covers the FDA regulatory process. The second part covers key legal and policy issues involved in a clinical organization: Health Insurance Portability and Accountability Act and Joint Commission on the Accreditation of Health Care Organizations rules on risk management, standards, regulations, compliance and ethics. Prerequisites: Department approval; MASE 6325 OR EE 6325 OR EE 5325 OR MME 5325 with a grade of C or better, may be taken concurrently. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 5330. Data Communications.
Data Communications (3-0) Study of modern telecommunication and data networks; packet and circuit switched networks; ATM; congestion control; mathematical modeling of networks; economics.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5332. Coding and Error Correction.
Coding and Error Correction (3-0) Topics to be discussed: Galois Fields, channel capacity and coding, linear channel codes, convolutional codes, performance analysis of some well-known codes, a few decoding techniques, and modulation and coding trade-offs. Prerequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5333. Data Compression.
The study of the theory and practice of modern lossless and lossy compression methods. Included will be an analysis of current international compression standards for speech, audio, and video, such as CELP, MP3, JPEG, and MPEG. This class has application in the area of communications, multimedia, and signal processing. Prerequisite: EE 3384, or equivalent, with a grade of "C" or better.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
EE 5336. Adv Fiber Optic Communications.
Advanced Fiber Optic Communications (3-0) In depth study of dispersion and attenuation in optical fibers, non-linear propagation effects, optical
amplifiers, sources and detectors, wavelength division multiplexing, coherent systems, performance evaluation of fiber optic systems, and system design
considerations. Restricted to majors: EE, COMP ENGR, and GRAD COMP ENGR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

EE 5337. Computational Electromagnetics.
Computational Electromagnetics A course covering many of the most popular methods used in modern computational electromagnetics. Methods
include transfer matrix method, finite-difference, frequency-domain, finite-difference, time-domain, beam propagation method, plane wave expansion
method, rigorous coupled-wave analysis, method of lines, slice absorption method, finite element method, and optimization. Prerequisites: MATH 2313,
MATH 2326, EE 3321 or Departmental Approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (MATH 2313 w/C or better AND MATH 2326 w/C or better ) AND (EE 3321 w/C or better)

Students will learn key concepts, processes, and key process activities to be carried out by systems engineers.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5342. Systems Engineering Mgmt.
Students will learn techniques and tools for systems engineering management. Topics include technical management, organizational environments, and
technical team structures, time and cost estimates and cost control, resource allocation and resource management. Students propose project studies,
with the approval of the professor, to be developed in phases as the course progresses.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
EE 5343. Requirements Engineering.
Methodologies, approaches, and techniques associated with requirements analysis and definition; process for defining requirements including feasibility study, requirements elicitation, formal specification, modeling, validation, verification, and documentation.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 5341 w/C or better)

EE 5344. Integratn, Verifictn, Validatn.
Integration, verification, and validation (IV&V) process and the recommended activities at each of the different program phases. Includes verification planning, verification methods and validation methods during development, during launching and operations of the product/system; test bed requirements and unitary test, subsystem tests and integration test data collection analysis and systems requirement validation. Test reporting and modification of change request processes that need to be initiated.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 5341 w/C or better)

Corequisite(s): EE 5345

EE 5345. Practicum in Elect & Comp Eng.
Practicum in Electrical Engineering and Computer Engineering Internship experience in electrical or computer engineering under the supervision of an ECE faculty member and a technical supervisor. The practicum is designed to provide ECE students with the opportunity to integrate the knowledge and skills developed during their academic program in a structured, supervised, real world professional setting. Requires a project proposal approved by the faculty member before enrolling in the course and a final report.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
Lecture Hours
3 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE, ELCE

Classification Restrictions:
Restricted to class of DR

Corequisite(s):

EE 5351. Physiological Systms Measurmts.
EE 5351: Physiological Systems and Measurements (3-0) A unified and systems approach of the functions of the human body. Origin and processing of biomedical signals to extract clinical information. Prerequisite: EE 4385 with a grade of "C" or better or instructor approval.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR
EE 5352. Med Diag & Therapeutic Instrmnt.
EE 5352: Medical Diagnostic and Therapeutic Instrumentation (3-0) Principles, applications, and design of medical, diagnostic, therapeutic, clinical laboratory instrumentation and imaging systems used in modern hospitals and clinics. Integration of concepts and techniques from human physiology, electronics, digital signal processing, and systems engineering to analyze and design biomedical instruments. Electrical safety aspects in medical instrumentation and medical environment. Prerequisite: EE 4385 with a grade of "C" or better or departmental approval.

Department: Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 5353: Biomedical Signal and Image Processing (3-0) Principles, methods, and algorithms for processing biomedical signals. Application of advanced DSP techniques to a number of problems in biomedical research and clinical medicine. Topics include biomedical data acquisition, filtering, feature extraction, modeling, and imaging, with examples from cardiology, neuro-physiology, muscular-physiology, and medical imaging. Prerequisite: EE 4383 with a grade of "C" or better or departmental approval.

Department: Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 4383 w/C or better)

EE 5354. Tomographic Imaging.
EE 5354: Tomographic Imaging (3-0) Study of physical and mathematical principles used in tomography. Topics include mathematical model for tomography with non-diffracting as well as diffracting sources. Radon transform, Fourier transform, Hilbert transform. Algorithms for image reconstruction from projections, filtered back-projection algorithm, algebraic reconstruction algorithms. Problems associated with data acquisition in computed tomography such as finite beam width, aliasing artifacts, and noise. Prerequisite: EE 4383 with a grade of "C" or better or departmental approval.

Department: Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 5355. Contmp Topics in Bioelectmgntm.
EE 5355: Contemporary Topics in Bioelectromagnetism (3-0) The laws and principles of electromagnetism as they relate to biology, followed by an in depth introduction to a specific applied area of biomedical research. Such areas may vary with the semester of offering and may include topics such as electrocardiography, magnetocardiography, encephalography, and tomography. Prerequisite: Departmental approval.

Department: Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR
EE 5356. Telemedicine & Img Informatics.
Telemedicine is a rapidly developing application of clinical medicine where medical information is transferred through interactive audiovisual media for the purpose of consulting, and sometimes remote medical procedures or examinations. It will cover topics such as clinical, technical and administrative issues in telemedicine. Will also cover healthcare delivery in low-resource settings, by using advanced technologies. Corequisite: Department approval.

**Department:** Electrical & Computer Eng.

3 Credit Hours  
3 Total Contact Hours  
0 Lab Hours  
3 Lecture Hours  
0 Other Hours  

**Classification Restrictions:**  
Restricted to class of DR

EE 5357. Biomechatronics.
Biomechatronics is an interdisciplinary study of biology, neurosciences, mechanics, electronics and robotics. The study focuses on the interactivity of biological organs (including the brain) with electromechanical devices and systems. The course will cover topics including but not limited to the human muscle, skeleton, and nervous system, with the goals of assisting or enhancing human motor control that can be lost or impaired by disease, trauma, or other defects. Corequisite: Department approval.

**Department:** Electrical & Computer Eng.

3 Credit Hours  
3 Total Contact Hours  
0 Lab Hours  
3 Lecture Hours  
0 Other Hours  

EE 5360. Computer Vision.
Computer Vision (3-0) Fundamental concepts associated with the construction of meaningful descriptions of physical objects from images; including image segmentation, two-dimensional and three-dimensional representations, knowledge representation, matching and inference.

**Department:** Electrical & Computer Eng.

3 Credit Hours  
3 Total Contact Hours  
0 Lab Hours  
3 Lecture Hours  
0 Other Hours  

**Major Restrictions:**  
Restricted to majors of CEPH, EE, EECE

**Classification Restrictions:**  
Restricted to class of DR

EE 5366. Fuzzy Logic & Engineering.
EE 5366: Fuzzy Logic and Engineering Underlying philosophy of the theory of fuzzy sets and its applications in engineering. Fuzzy logic, fuzzy reasoning and rules, and fuzzy systems. Decision-making in the realm of vague qualitative and imprecise data. Current models, simulation tools, hardware implementations and their applications will also be covered.

**Department:** Electrical & Computer Eng.

3 Credit Hours  
3 Total Contact Hours  
0 Lab Hours  
3 Lecture Hours  
0 Other Hours  

**Major Restrictions:**  
Restricted to majors of EE

**Classification Restrictions:**  
Restricted to class of DR
Introduction to advanced real-time cyber security techniques and methods in various applications such as cloud computing, internet of things (IoT), smart grids, and other generation systems. Focus on system impact under interception of control signals, attacks on system components, and manipulation of monitoring data. Gain in-depth understanding of current trends in cybersecurity. Become familiar with risks and vulnerabilities inherent in cyber-physical systems (CPS) architectures and have the opportunity to work on realistic CPS projects. Keywords: electric power, power systems, power flow

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE, ELCE

Restricted to class of DR

Prerequisite(s): (EE 4377 w/C or better)

EE 5369. CMOS Digital Circuit Design.
EE 5369: CMOS Digital Circuit Design (3-0) Analysis and design of digital integrated circuits in CMOS technology. Discussion of different models for MOS transistors and how to use them to analyze circuit performance. Analysis of logic families and styles including complementary static logic, dynamic, and pass-transistor. Topics include sizing for minimum delay, noise and noise margin, power dissipation, and cost. A significant circuit design is assigned as a final project such as DRAM memory or Phase Lock Loop.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 5370. Operating Systems.
Operating Systems (3-0) Fundamental concepts as they apply to multiprogrammed, multi-user operating systems within distributed computer systems. Topics include an overview of the kernel, file systems, process control and scheduling, interprocess communication, memory management, and I/O. The internal algorithms of a contemporary operating systems are examined.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (CS 4375 w/C or better) OR (EE 4374 w/C or better)
Digital Signal Processing (3-0) A course emphasizing the theory behind the following: The Discrete Fourier Transform (DFT) and its role in the representation, analysis, and processing of periodic and finite-duration signals; Fast Fourier Transform (FFT) algorithms for efficient computation of the DFT; sample rate change and other basic multirate signal processing systems; FIR and IIR digital filter design procedures.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 4383 w/C or better)

EE 5372. Image Processing.
Image Processing (3-0) A course covering the following topics: point, algebraic, and geometric operations on digital images; two-dimensional digital filtering and Fourier transforms; image enhancement, segmentation, restoration, and compression techniques. Restricted to majors: EE, COMP ENGR, and GRAD COMP ENGR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 5371 w/C or better)

EE 5373. Intro to Remote Sensing Syst.
Introduction to imaging principles and system performance parameters for optical systems used in multi/hyperspectral remote sensing. Study and evaluation of existing and proposed ground-based, airborne, and satellite remote sensing platforms. Introduction to the end-to-end information processing chain including algorithms, methodologies and tools for information extraction and management in multi/hyperspectral remote sensing. Discussion of research trends in the area.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

EE 5374. Advanced Digital Syst Design I.
Advanced Digital System Design I (3-0) Modern logic design methodologies of large digital systems with standard SSI, MSI and LSI, including PLD's and microprocessors. Emphasis is placed on the use of multilevel digital simulation and hardware language description.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 4342 w/C or better)
EE 5375. ASIC Design and Test.
Emphasis on the principles and techniques of testability design and testing of digital logic circuits, including test pattern generation and fault simulation. Restricted to major: EE, COMP ENGR, and GRAD COMP EMGR. Prerequisite: EE 5374.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 5376. Computer Architecture I.
Computer Architecture I (3-0) Processor Design, microprogramming, memory architecture including memory hierarchy, cache and virtual memory, and pipelines. An introduction to multiprocessor configurations.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3376 w/C or better AND EE 4342 w/C or better)

EE 5377. Computer Architecture II.
Computer Architecture II (3-0) Advanced topics in computer architecture parallel and distributed processing. Restricted to major: EE, COMP ENGR, and GRAD COMP ENGR. Prerequisite: EE 5376.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 5378. Advanced VLSI Design.
Advanced VLSI Design (3-0) Important issues related to design of CAD tools for VLSI chip layout, testing and simulation. Topics include area-time optimization, floor-plan and functional block placement, routing and functional testing for large systems.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 4375 w/C or better)
Network Protocols (3-0) The theory and application of protocols such as TCP, IP, Sockets, and RPCs that are employed in computer network communications. Concentrates on network protocols that are employed from the network, transport, and process layers of the simplified 4-layer model for computer communications.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 5370 w/C or better)

EE 5380. Energy Sustainability.
This course will provide understanding of conventional and sustainable energy production and utilization that will serve as a foundation for Renewable Energy Systems in the context of the current energy infrastructure. In this course, the various alternative energy sources available, including renewable energy (hydroelectric, solar, wind, nuclear, biomass, and geothermal) will be analyzed. Each energy source's pros and cons based on our needs, availability, and environmental impact aspects will be discussed.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3385 w/C or better)

EE 5381. Applied Photovoltaics.
Applied Photovoltaics Semiconductors have emerged as the most promising material class of materials that can convert sunlight directly into electrical energy. This course presents the fundamental principles of the solar energy conversion process and the most common cell technologies are discussed. This course will also cover a range of fundamental problems and the relationship between the physics, material science, and technology aspects of solar cell development.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE, ELCE

Classification Restrictions:
Restricted to class of DR
EE 5383. Smart Grid Fundamentals.
The aim of this course is to provide basic concepts and principles of Smart Grid. This course will provide the working definition, the functions, the design criteria and techniques and technology needed for building Smart Grid. The focus will be on the motivation for the Smart Grid development and analytical tools for Smart Grid design and developmental strategies based on various community constraints and energy needs.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours

0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 3385 w/C or better)

This course introduces the students to advanced power system optimization techniques at the transmission level, including optimal transmission switching and the optimization of flexible AC transmission systems (FACTS). Students will also learn to develop software tools to solve these problems in this course.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 4384 w/C or better)

EE 5386. High Frequency Power Converter.
The course introduces the concept of high-frequency resonant switching converters, and the design, control, and applications of high frequency resonant switching converters.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 3385 w/C or better)

The course will provide a perspective on today's modern power system structure and train the students to look at technical issues of power system operations simultaneously with the economic aspects. Starting with a background sketch of the power industry and power system basics, this course will focus on topics related to power system deregulation, wholesale energy markets, power market structure and operations, power system economics, short-term planning issues, forecasting techniques in electric energy system including wind & solar energy issues as well as scheduling and risk management.

**Department:** Electrical & Computer Eng.

3 Credit Hours

0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 3385 w/C or better)
**EE 5389. Radar Signal Processing.**
Modern signal processing techniques for high range-resolution radar systems. One-and two-dimensional signals, high resolution radar, synthetic aperture radar, inverse synthetic aperture radar, radar tomography, ultrawideband radar.

**Department:** Electrical & Computer Eng.

**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 4389 w/C or better)

**EE 5390. Special Topics Electrical Engr.**
Advanced topics of contemporary interest in electrical or computer engineering. May be repeated for credit when topic varies. Restricted to majors: EE and EECE. Prerequisite: Instructor approval.

**Department:** Electrical & Computer Eng.

**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Major Restrictions:**
Restricted to majors of EE, EECE

**Classification Restrictions:**
Restricted to class of DR

**EE 5391. Individual Studies.**
Individual variable-credit research, design or analysis on advanced phases of electrical or computer engineering problems conducted under the direct supervision of a faculty member. A maximum of three credit hours may be applied toward the MS degree. Restricted to majors: EE and EECE. Prerequisite: Permission of the Graduate Advisor.

**Department:** Electrical & Computer Eng.

**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
0 Lecture Hours
3 Other Hours

**Major Restrictions:**
Restricted to majors of EE, EECE

**Classification Restrictions:**
Restricted to class of DR

**EE 5392. Research Methods.**
Techniques, tools, and skills needed to conduct, evaluate, document, and disseminate research in Electrical Engineering. Students will produce and defend a written research proposal in a specific area of interest. Corequisite: Department approval required.

**Department:** Electrical & Computer Eng.

**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Classification Restrictions:**
Restricted to class of DR
EE 5394. Graduate Research.
Graduate Research (0-0-3) Individual variable credit research in electrical or computer engineering. Cannot be used to satisfy maximum degree requirements. Grade of P or F. Restricted to majors: EE and COMP ENGR. Prerequisite: Department approval and graduate standing.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours

Restricted to majors of EE, EECE

EE 6192. Clinical Rotations-Engineers.
This course facilitates the recognition of the importance of designing medical devices and biologics with end-user in mind. Each rotation will include background in terms of theory and clinical application provided by a physician, including selected case studies, followed by "hands-on" experience whenever possible with technical personnel. Clinical rotations will be at the Foster School of Medicine, the William Beaumont Army Medical Center, and the US- Mexico Border Health Association. Prerequisites: Department approval; BIOL 6304; DRSC 5495; and MASE 6321 OR EE 6321 OR MME 5312 OR EE 5321 with a grade of C or better. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 6193. Doctoral Clinical Research.
The PhD. student is matched with a research clinician and will "shadow" the clinician throughout the course. The following activities are conducted: direct observation of procedures (diagnostic and interventional), development of Institutional Review Board protocols, clinical data analysis, and interaction with the company sponsoring a device/drug trial. Prerequisites: Department approval; BIOL 6305, DRSC 5495, and MASE 6321 with a grade of C or better. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

EE 6194. Graduate Research.
Individual variable credit research in electronic and computer engineering. Prerequisite: Doctoral standing and department approval.
Department: Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour

EE 6195. Doctoral Seminar.
Doctoral Seminar (1-0) Conferences and discussions of various topics in Electrical and Computer Engineering by faculty, graduate students, and speakers from industry and other institutions. Required once of all Doctoral students prior to graduation. Students are required to attend a certain number of University professionally related lectures, as specified by the instructor. Restricted to major: Grad COMP ENGR and Doctoral standing.
Department: Electrical & Computer Eng.
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
EE 6197. Medical Device Practicum.
The use of structured techniques for client needs identification will be taught. Student teams will follow a structured process for the concept generation
design of a biomedical device. Students will consult experts, perform patent searches, and conduct competitive benchmarking as part of external
searches for solutions. Prerequisites: Department approval; MASE 6192 and MASE 6327 with a grade of C or better. Restricted to level of DR, GR.
Department: Electrical & Computer Eng.
1 Credit Hour
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 6291. Individual Studies.
Individual variable-credit research, design or analysis on advanced phases of electrical engineering problems conducted under the direct supervision of
a faculty member. A maximum of three credit hours may be applied towards the M.S. degree.
Department: Electrical & Computer Eng.
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours

EE 6294. Graduate Research.
Individual variable credit research in electronic and computer engineering. Prerequisite: Doctoral standing and Department approval.
Department: Electrical & Computer Eng.
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

Probability and Random Processes (3-0) Random process fundamentals, including spectral analysis, special classes of random processes, linear
systems response to random processes, and applications.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CS, EE, EECE
Prerequisite(s): (EE 3384 w/C or better ) OR (EE 3484 w/C or better ) OR (STAT 3330 w/C or better)

EE 6301. Computational Methods for EE.
Computational Methods for Electrical Engineers (3-0) A broad coverage of the field of numerical methods emphasizing computer techniques as they
apply to Electrical Engineering. Topics generally include numerical integration and differentiation, boundary-value and eigenvalue-value problems, finite-
difference and finite-elements methods, and solutions to partial, parabolic and hyperbolic differential equations.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CS, EE, EECE
Prerequisite(s): (MATH 2326 w/C or better)
EE 6302. Linear Systems Analysis.
Linear Systems Analysis (3-0) The analysis of generalized linear systems through a state space approach. Relationships with frequency domain design. Modeling of physical systems. Controllability, observability, pole placement, and design of controllers and observers. Eigenstructures
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CE, CEPH, EE

Classification Restrictions:
Restricted to class of DR

EE 6306. Antenna Theory.
Antenna Theory (3-0) Fundamental theory of point sources; the antenna as an aperture; methods of analyzing and calculating characteristics of various types of antennas; self and mutual impedances of antennas; array of linear antennas; antenna measurement techniques.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3321 w/C or better)

EE 6311. Semiconductor Device Physics.
Advanced semiconductor principles and device building blocks, and their application to electronic devices. Topics include energy bands and gap, carrier statistics and transport, junctions and interfaces, and electronic devices. Prerequisite: EE 3329 with C or better. Corequisite: Department approval required.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (EE 3329 w/C or better)

EE 6312. Advanced Optoelectronic Device.
Advanced Optoelectronic Device (3-0) Theory and application of advanced photonic device including injection lasers, photodiodes, infra-red detectors, solar cells, electroluminescent displays.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Prerequisite(s): (EE 5311 w/C or better)
EE 6313. Modern Semiconductor Devices.
Study of modern electronic devices that exploit functional properties of matter and advances in modern technologies. Devices covered include transistors, diodes and other modern devices. Prerequisite: EE 6311 w/C or better. Corequisite: Department approval required.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (EE 6311 w/C or better)

EE 5318: Electronic Materials Processing (3-0) The science and technology of integrated device/circuit fabrication including the effect of defects. Includes silicon oxidation, lithography, etching, thin film deposition, diffusion, and ion implantation.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 3329 w/C or better)

EE 6320. Nanoelectronics.
Review of quantum mechanics of free and confined electrons including quantum wells, wires and dots. Study of modern electronic devices that possess dimensions at which the quantum mechanical behavior of matter is manifested including devices with single-, few- and many-electron phenomena.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (EE 5311 w/B or better)

EE 6321. BME for Global Health.
Graduate level course that provides an overview of the role of engineering technological advances to improve human health. The following points will be emphasized throughout the semester: What are the challenges in healthcare delivery in remote locations; How are we paying for healthcare delivery; What is the role of engineering to solve healthcare problems; and how do new healthcare technologies move from the lab to the bedside. Prerequisite: Department approval. Restricted to level of GR, DR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Advanced Digital Communications (3-0) Source coding, generation, transmission, and detection of digital baseband and bandpass signals, optimum receivers, block and convolutional channel coding, adaptive equalization, encryption and decryption, and introduction to spread spectrum.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CEPH, EE, EECE

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 3384 w/C or better)

EE 6324. Stat Infer for Signal Analysis.
Statistical Inference for Signal Analytics: Graduate-level introduction to the principles of statistical inference using probabilistic models in signal and information processing. The material in this course constitutes a common foundation for work in signal processing, statistical learning, pattern recognition, computer vision, control, and communication. Examples from these areas and current research trends will be discussed.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (EE 5300 w/B or better)

EE 6325. Telemedicine & Imaging Informa.
This course focuses on applications of point-of-care diagnostics for chronic disease management. It also introduces basic concepts in telemedicine. Students will gain the knowledge, understanding and practical preparation needed to implement a program to diagnose and treat patients in remote areas. Prerequisite: Department approval. Restricted to level of DR, GR.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 6326. BME Dev Design & Regulation.
This course introduces the regulatory requirements for the design, testing, and clinical implementation of medical devices and biologics. The first part covers the FDA regulatory process. The second part covers key legal and policy issues involved in a clinical organization: Health Insurance Portability and Accountability Act and Joint Commission on the Accreditation of Health Care Organizations rules on risk management, standards, regulations, compliance and ethics. Prerequisites: MASE 6325 OR EE 6325 OR EE 5325 OR MME 5325 w/C or better, may be taken concurrently. Department approval also required. Restricted to level of DR, GR.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
EE 6330. **Data Communications.**
Data Communications (3-0) Study of modern telecommunication and data networks; packet and circuit switched networks; ATM; congestion control; mathematical modeling of networks; economics.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours
**Major Restrictions:**
Restricted to majors of CEPH, EE, EECE

EE 6333. **Data Compression.**
The study of the theory and practice of modern lossless and lossy compression methods. Included will be an analysis of current international compression standards for speech, audio, and video, such as CELP, MP3, JPEG, and MPEG. This class has application in the area of communications, multimedia, and signal processing.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours
**Major Restrictions:**
Restricted to majors of CS, EE

**Classification Restrictions:**
Restricted to class of DR

**Prerequisite(s):** (EE 3384 w/C or better)

EE 6336. **Adv Fiber Optic Communications.**
Advanced Fiber Optic Communications (3-0) In depth study of dispersion and attenuation in optical fibers, non-linear propagation effects, optical amplifiers, sources and detectors, wavelength division multiplexing, coherent systems, performance evaluation of fiber optic systems, and system design considerations.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours
**Major Restrictions:**
Restricted to majors of CEPH, EE, EECE

**Classification Restrictions:**
Restricted to class of DR

EE 6341. **Systems Engineering Fundamentals.**
Students will learn key concepts, processes, and key process activities to be carried out by systems engineers.
**Department:** Electrical & Computer Eng.
**3 Credit Hours**
**3 Total Contact Hours**
0 Lab Hours
3 Lecture Hours
0 Other Hours
EE 6342. Systems Engineering Mgmt.
Students will learn techniques and tools for systems engineering management. Topics include technical management, organizational environments, and technical team structures, time and cost estimates and cost control, resource allocation and resource management. Students propose project studies, with the approval of the professor, to be developed in phases as the course progresses.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

EE 6343. Requirements Engineering.
Methodologies, approaches, and techniques associated with requirements analysis and definition; process for defining requirements including feasibility study, requirements elicitation, formal specification, modeling, validation, verification, and documentation.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (EE 5341 w/C or better)

EE 6344. Integrtn, Verifctn, Validatn.
Integration, verification, and validation (IV&V) process and the recommended activities at each of the different program phases. Includes verification planning, verification methods and validation methods during development, during launching and operations of the product/system; test bed requirements and unitary test, subsystem tests and integration test data collection analysis and systems requirement validation. Test reporting and modification of change request processes that need to be initiated.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours

Corequisite(s): EE 5345

EE 6345. Practicum in Elect & Comp Eng.
Practicum in Electrical Engineering and Computer Engineering Internship experience in electrical or computer engineering under the supervision of an ECE faculty member and a technical supervisor. The practicum is designed to provide ECE students with the opportunity to integrate the knowledge and skills developed during their academic program in a structured, supervised, real world professional setting. Requires a project proposal approved by the faculty member before enrolling in the course and a final report.

Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE, ELCE
EE 6351. Physiological Sys & Meas.
A unified and integrated approach to the functions of the human body from cellular to system level. Origin and processing of biomedical signals to extract clinical information. Prerequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 6352. Medical Diag & Therap Devices.
Principles, applications and design of medical, diagnostic, therapeutic, clinical laboratory instrumentation used in modern hospitals and clinics. Integration of concepts and techniques from human physiology, electronics, digital signal processing, and systems engineering to analyze and design biomedical instruments. Electrical safety aspects in medical instrumentation and medical environment. Prerequisite: EE 4385 w/C or better or Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 5353: Biomedical Signal and Image Processing (3-0) Principles, methods, and algorithms for processing biomedical signals. Application of advanced DSP techniques to a number of problems in biomedical research and clinical medicine. Topics include biomedical data acquisition, filtering, feature extraction, modeling, and imaging, with examples from cardiology, neuro-physiology, muscular-physiology, and medical imaging.
Department: Electrical & Computer & Engineering.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions: Restricted to majors of EE, EECE

Classification Restrictions: Restricted to class of DR

Prerequisite(s): (EE 4383 w/C or better)

EE 6356. Telemedicine & Img Informatics.
Telemedicine is a rapidly developing application of clinical medicine, where medical information is transferred through interactive audiovisual media for the purpose of consulting, and sometimes remote medical procedures or examinations. This course will cover topics such as clinical, technical and administrative issues in telemedicine. It will also cover healthcare delivery in low-resource settings by using advanced technologies. It is designed for graduate students, especially suitable for PhD students. Corequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 6357. Biomechatronics.
Biomechatronics is an interdisciplinary study of biology, neurosciences, mechanics, electronics and robotics. The study focuses on the interactivity of biological organs (including the brain) with electromechanical devices and systems. This course involves the study of movements, movement coordination and muscle functioning in order to understand the basic requirements of various orthotic and prosthetic medical aids. The study of biomechatronics as an interdisciplinary course will take into account the biology, mechanical and the electrical aspects of the human body. Corequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
EE 6360. Computer Vision.
Computer Vision (3-0) Fundamental concepts associated with the construction of meaningful descriptions of physical objects from images; including image segmentation, two-dimensional and three-dimensional representations, knowledge representation, matching and inference.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE

EE 6366. Fuzzy Logic & Engineering.
EE 5366: Fuzzy Logic and Engineering Underlying philosophy of the theory of fuzzy sets and its applications in engineering. Fuzzy logic, fuzzy reasoning and rules, and fuzzy systems. Decision-making in the realm of vague qualitative and imprecise data. Current models, simulation tools, hardware implementations and their applications will also be covered.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of EE

Introduction to advanced real-time cyber security techniques and methods in various applications such as cloud computing, internet of things (IoT), smart grids, and other generation systems. Focus on system impact under interception of control signals, attacks on system components, and manipulation of monitoring data. Gain in-depth understanding of current trends in cybersecurity. Become familiar with risks and vulnerabilities inherent in cyber-physical systems (CPS) architectures and have the opportunity to work on realistic CPS projects. Keywords: electric power, power systems, power flow
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of EE, EECE, ELCE
Prerequisite(s): (EE 4377 w/C or better)

EE 6369. CMOS Digital Circuit Design.
EE 5369: CMOS Digital Circuit Design (3-0) Analysis and design of digital integrated circuits in CMOS technology. Discussion of different models for MOS transistors and how to use them to analyze circuit performance. Analysis of logic families and styles including complementary static logic, dynamic, and pass-transistor. Topics include sizing for minimum delay, noise and noise margin, power dissipation, and cost. A significant circuit design is assigned as a final project such as DRAM memory or Phase Lock Loop.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of EE
Classification Restrictions:
Restricted to class of DR
EE 6370. Operating Systems.
Operating Systems (3-0) Fundamental concepts as they apply to multiprogrammed, multi-user operating systems within distributed computer systems. Topics include an overview of the kernel, file systems, process control and scheduling, interprocess communication, memory management, and I/O. The internal algorithms of a contemporary operating systems are examined.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (CS 4375 w/C or better) OR (EE 4374 w/C or better)

EE 6371. Digital Signal Processing.
Digital Signal Processing (3-0) A course emphasizing the theory behind the following: The Discrete Fourier Transform (DFT) and its role in the representation, analysis, and processing of periodic and finite-duration signals; Fast Fourier Transform (FFT) algorithms for efficient computation of the DFT; sample rate change and other basic multirate signal processing systems; FIR and IIR digital filter design procedures.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 4383 w/C or better)

EE 6372. Image Processing.
Image Processing (3-0) A course covering the following topics: point, algebraic, and geometric operations on digital images; two-dimensional digital filtering and Fourier transforms; image enhancement, segmentation, restoration, and compression techniques. Restricted to majors: EE, COMP ENGR, and GRAD COMP ENGR.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 5371 w/C or better)

EE 6374. Advanced Digital Syst Design I.
Advanced Digital System Design I (3-0) Modern logic design methodologies of large digital systems with standard SSI, MSI and LSI, including PLD's and microprocessors. Emphasis is placed on the use of multilevel digital simulation and hardware language description.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 4342 w/C or better)
EE 6376. Computer Architecture I.
Computer Architecture I (3-0) Processor Design, microprogramming, memory architecture including memory hierarchy, cache and virtual memory, and pipelines. An introduction to multiprocessor configurations.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 3376 w/C or better AND EE 4342 w/C or better)

EE 6378. Advanced VLSI Design.
Advanced VLSI Design (3-0) Important issues related to design of CAD tools for VLSI chip layout, testing and simulation. Topics include area-time optimization, floor-plan and functional block placement, routing and functional testing for large systems.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 4375 w/C or better)

Network Protocols (3-0) The theory and application of protocols such as TCP, IP, Sockets, and RPCs that are employed in computer network communications. Concentrates on network protocols that are employed from the network, transport, and process layers of the simplified 4-layer model for computer communications.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CEPH, EE, EECE
Prerequisite(s): (EE 5370 w/C or better)

EE 6380. Energy Sustainability.
This course will provide understanding of conventional and sustainable energy production and utilization that will serve as a foundation for Renewable Energy Systems in the context of the current energy infrastructure. In this course, the various alternative energy sources available, including renewable energy (hydroelectric, solar, wind, nuclear, biomass, and geothermal) will be analyzed. Each energy source's pros and cons based on our needs, availability, and environmental impact aspects will be discussed.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (EE 3385 w/C or better)
EE 6383. Smart Grid Fundamentals.
The aim of this course is to provide basic concepts and principles of Smart Grid. This course will provide the working definition, the functions, the design criteria and techniques and technology needed for building Smart Grid. The focus will be on the motivation for the Smart Grid development and analytical tools for Smart Grid design and developmental strategies based on various community constraints and energy needs.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Prerequisite(s):** (EE 3385 w/C or better)

This course introduces the students to advanced power system optimization techniques at the transmission level, including optimal transmission switching and the optimization of flexible AC transmission systems (FACTS). Students will also learn to develop software tools to solve these problems in this course.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Prerequisite(s):** (EE 4384 w/C or better)

EE 6386. High Frequency Power Converter.
The course introduces the concept of high-frequency resonant switching converters, and the design, control, and applications of high frequency resonant switching converters.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Prerequisite(s):** (EE 3338 w/C or better AND EE 3385 w/C or better)

The course will provide a perspective on today’s modern power system structure and train the students to look at technical issues of power system operations simultaneously with the economic aspects. Starting with a background sketch of the power industry and power system basics, this course will focus on topics related to power system deregulation, wholesale energy markets, power market structure and operations, power system economics, short-term planning issues, forecasting techniques in electric energy system including wind & solar energy issues as well as scheduling and risk management.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Prerequisite(s):** (EE 3385 w/C or better)

Radar Signal Processing (3-0) Modern signal processing techniques for high range-resolution radar systems. One-and two-dimensional signals, high resolution radar, synthetic aperture radar, inverse synthetic aperture radar, radar tomography, ultrawide radar.

**Department:** Electrical & Computer Eng.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Major Restrictions:**
Restricted to majors of CEPH, EE, EECE

**Prerequisite(s):** (EE 4389 w/C or better)
EE 6390. Special Topics.
Special Topics (3-0) Advanced topics of contemporary interest in computer systems engineering. May be repeated twice for credit when topic varies. Prerequisites: doctoral candidacy and department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CEPH

EE 6391. Individual Studies.
Individualized study projects in electrical engineering and/or related areas under supervision of a member of the faculty. A maximum of three credit hours may be applied towards the Ph.D. degree.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

Techniques, tools, and skills needed to conduct, evaluate, document, and disseminate research in Electrical Engineering. Doctoral students will produce and defend a written research proposal in a specific area of interest. Corequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

EE 6394. Graduate Research.
Individual variable credit research in electrical and computer engineering. Prerequisite: Doctoral standing and department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 6396. Graduate Projects.
Graduate Projects (0-0-3) Individual research, design or analysis on advanced phases of electrical or computer engineering problems conducted under the direct supervision of a faculty member.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

Major Restrictions:
Restricted to majors of EE, EECE
EE 6397. Graduate Projects.
Graduate Projects (0-0-3) Individual research, design or analysis on advanced phases of electrical or computer engineering problems conducted under the direct supervision of a faculty member.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
Major Restrictions:
Restricted to majors of EE, EECE
Prerequisite(s): (EE 5396 w/P or better)

EE 6398. Dissertation.
Dissertation for doctoral students. Prerequisite: Doctoral standing and department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 6399. Dissertation.
Dissertation for doctoral students. Prerequisite: Department approval.
Department: Electrical & Computer Eng.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

EE 6494. Graduate Research.
Individual variable credit research in electrical and computer engineering. Prerequisites: Doctoral standing and department approval.
Department: Electrical & Computer Eng.
4 Credit Hours
4 Total Contact Hours
0 Lab Hours
0 Lecture Hours
