Geology Courses

Courses

GEOL 5101. Graduate Seminar.
Graduate Seminar (1-0) Required of all graduate students. Discussion of various geological topics by the faculty, graduate students, and speakers from industry and other institutions.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5102. Geology of the Southwest.
Geology of the Southwest (1-3) A field-based class in which geologic features of the southwestern U.S. will be visited and examined in detail. Emphasis will be placed on stratigraphy, paleontology, structural features, and geomorphology of the region. Rock, mineral, and fossil samples will be collected to augment teaching materials in students’ classrooms. Written reports will be required. One hour lecture, bi-weekly 6-hour field trips. Prerequisites: GEOL 5401 with a grade of "C" or better and department approval.
Department: Geology
1 Credit Hour
4 Total Contact Hours
3 Lab Hours
1 Lecture Hour
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5115. Selected Topics in Geol Scien.
Selected Topics in the Geological Sciences (1-0) Study of advanced topics in such fields as structural geology, economic geology, paleontology, petrology, and geochemistry. May be repeated for credit when the topic varies. Prerequisite: Department approval.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5162. Directed Study in Geology.
Directed Study in Geology (0-0-1) Prerequisites: Graduate standing and department approval.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour
Classification Restrictions:
Restricted to class of DR
GEOL 5215. Selected Topics in Geol Scienc.
Selected Topics in Geological Sciences (2-0) Study of advanced topics in such fields as structural geology, economic geology, paleontology, petrology, and geochemistry. May be repeated for credit when the topics vary.
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5262. Directed Study in Geology.
Directed Study in Geology (0-0-2)
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5289. Graduate Research in Geol Sci.
Graduate Research in Geological Science (0-0-2)
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours
Classification Restrictions:
Restricted to class of DR

Computer Applications in the Earth Sciences (3-0) Principles and applications of software to earth science data analysis and modeling. Topics will include uses of Geographic Information Systems, remote sensing data types and analysis, and uses of other common PC-based applications for earth science data analysis.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 5304. Earth Structure.
Earth Structure (3-0) Fundamentals of the origin and evolution of earth structure at all scales. Topics include, geographical and geophysical methods of determining the structure of the earth, processes of rock deformation including folding and fracturing, plate tectonics, and the influence of large-scale plate tectonic processes on local earth structure.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5401 w/C or better)
GEOL 5305. Earth Materials.
Earth Materials (2-3) Study of the minerals and rocks that comprise the crust of the earth, utilizing hand specimens and thin sections of common minerals, igneous, metamorphic, and sedimentary rocks. Materials common in the southwestern part of the U.S. will be given some emphasis.

Department: Geology

3 Credit Hours

5 Total Contact Hours

3 Lab Hours

2 Lecture Hours

0 Other Hours

Classification Restrictions:

Restricted to class of DR

Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 5306. Studies in Oceanography.
Studies in Oceanography (3-0) Review of marine biology, marine chemistry, marine geology, physics of the oceans and consideration of relevant environmental issues. Emphasis will be on primary literature, supplemented by text reading. Prerequisites: GEOL 5401 with a grade of "C" or better and department approval.

Department: Geology

3 Credit Hours

3 Total Contact Hours

0 Lab Hours

3 Lecture Hours

0 Other Hours

Classification Restrictions:

Restricted to class of DR

GEOL 5307. Paleobiology.
Paleobiology (2-3) Survey of life on earth as revealed by the fossil record. Topics will include the origin of life, evolutionary processes, diversification of life through time, causes and effects of extinction, identification and classification of major groups of organisms, biostratigraphy. Prerequisites: GEOL 5401 with a grade of "C" or better and department approval.

Department: Geology

3 Credit Hours

5 Total Contact Hours

3 Lab Hours

2 Lecture Hours

0 Other Hours

Classification Restrictions:

Restricted to class of DR

GEOL 5308. Planetary Geology.
Planetary Geology (3-0) A survey of the composition, evolution, and geologic features of planetary bodies and the potential for life in the solar system. Topics include origin of the solar system, planetary atmospheres, comparative planetology of terrestrial and Jovian planets, small bodies such as moons, comets and asteroids.

Department: Geology

3 Credit Hours

3 Total Contact Hours

0 Lab Hours

3 Lecture Hours

0 Other Hours

Classification Restrictions:

Restricted to class of DR

Prerequisite(s): (GEOL 5401 w/C or better)
GEOL 5309. Mineral Resrcs, Econ & Environ.
Mineral Resources, Economics, and the Environment (3-0) Geological characteristics and classification of metallic, non-metallic, and fuel resources. Environmental consequences of mineral extraction and issues of public policy.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 5310. Intro Entrepreneurial Geosci.
Entrepreneurial activities in the geosciences focus on discovery and development in the energy and mineral exploration industries. This course will consist of a survey of all aspects of such activities, including but not limited to: 1) money sources, 2) the technical challenges of geology, extraction and metallurgy, and the environment mainly water, 3) social issues and ethics. Weekly discussions of current entrepreneurial events are required. Selections from the 150 professional development web courses in EduMin will enhance student learning. Written and oral products are required.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5311. Adv Entrepreneurial G.S..
Entrepreneurial activities in the geosciences focus on discovery and development in the energy and mineral exploration industries. This course will follow an introductory survey, and it will enhance and elaborate selected aspects of money sources, technical and social issues. Each student will engage in a research project and produce a high quality product, to be considered a mini Masters project.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5315. Selected Topics-Geological Sci.
Selected Topics in the Geological Sciences (3-0) Study of advanced topics in such fields as structural geology, economic geology, paleontology, petrology, and geochemistry. May be repeated for credit when topic varies. Prerequisite: Department approval.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
GEOL 5317. Hydrogeology.
Hydrogeology (3-0) Consideration of hydrologic cycle, groundwater flow, recharge and discharge of groundwater, types and properties of aquifers, principles of flow, groundwater models and groundwater flow to wells. Additional topics include aqueous geochemistry, isotope hydrology, and 1-d contaminant transport.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5318. Petroleum Geology.
Petroleum Geology (3-0) study of the mature, origin, migration, and accumulation of petroleum, including consideration of porosity/permeability in reservoir systems, behavior of reservoir fluids, and of trap systems. Relationships between plate tectonics and petroleum provinces will be examined.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5320. Environmental Tracers in Water.
Introduction to the use of environmental isotope tracers in studying water-related problems. Topics will cover the fundamentals of stable isotope geochemistry, the geochemical processes causing natural variations of isotope ratios in water, and the applications of isotopic techniques in determining ground water residence times and recharge conditions.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5321. Introduction to GIST.
Introduction to the principals and applications of Geographic Information Systems (GIS). Topics include the importance of validated databases, GIS design, data structures, producing map products, and spatial analysis. The laboratory will focus on the application of a common GIS software package to science and engineering projects.

Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR
GEOL 5322. Advanced GIST.
Advanced principals of Geographic Information Systems and Technology (GIST), with a focus on spatial analysis. Topics include combining data, map algebra, terrain modeling, spatial interaction modeling, along with basic remote sensing and digital image processing functions. The laboratory will focus on the application of a common GIS software package to science and engineering projects.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5321 w/C or better ) OR (GEOL 6331 w/C or better ) OR (GEOL 4385 w/C or better ) OR (SOCI 5381 w/C or better ) OR (INSS 5355 w/C or better)

GEOL 5323. Spat Analysis Earth/Env Sci.
This course focuses on advanced spatial analysis in geographic information systems applicable to the environmental, geological, and hydrological sciences. Students will be introduced to analytical tools such as spatial data interpolation techniques, point pattern, and density analysis, as well as emerging techniques in the research literature.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5321 w/C or better ) OR (GEOL 6331 w/C or better ) OR (GEOL 4385 w/C or better ) OR (SOCI 5381 w/C or better ) OR (INSS 5355 w/C or better)

GEOL 5324. Geocomputation.
This course focuses on the learning and development of computer coding to conduct geospatial analyses with multiple applications in earth, environmental science, engineering, natural resources, health and social sciences. Students will learn R and Python linked with GIS software. Specific topics will include computer programming techniques for combining different types of geospatial data, methods for datasets visualization, and predictive analytics. Advanced knowledge combines computer modeling development and testing, and machine learning techniques to extract patterns and predictions from big, spatio-temporal datasets.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5321 w/C or better ) OR (GEOL 6331 w/C or better ) OR (GEOL 4385 w/C or better ) OR (SOCI 5381 w/C or better ) OR (INSS 5355 w/C or better)

GEOL 5332. Carbonate Petrograph & Dep. Env.
Petrographic techniques and recognition & depositional interpretation of components of carbonate rocks. Interpretation of carbonate depositional environments from the rock record. Field trips are included. The class will focus on analysis of field examples.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of GEOL
GEOL 5336. Sequence Stratigraphy.
Learning the supporting concepts of the sequence stratigraphic approach and utilizing practical example exercises in lab to support the understanding of these still evolving concepts. Field trips are included. The class will focus on analysis of field examples.
Department: Geology
3 Credit Hours
4 Total Contact Hours
2 Lab Hours
2 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of GEOL

GEOL 5343. Isotope Geology.
Isotope Geology (3-0) Study of the systematics and geochemistry of radiogenic and stable isotopes. The course includes both geochronology and the use of isotopes as tracers in igneous, sedimentary, and metamorphic processes.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5344. Advanced Petrology.
Advanced Petrology (2-3) Study of magmas and magma genesis in light of field, theoretical, and experimental considerations. The course includes interpretation of isotopic and trace element data. Laboratory studies focus on field trips and petrographic description of thin sections. Course fee required.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (GEOL 3315 w/D or better ) OR (GEOL 3115 w/D or better AND GEOL 3215 w/D or better)

GEOL 5345. Environmental Geochemistry.
Environmental Geochemistry (3-0) Processes of a geological nature which are important in environmental studies will be the topic of this course. The geological context is usually important in determining the effect of foreign intrusion into the natural environment. The course will involve problem solving, class participation, exams, field trips, and a semester project report. Prerequisite: Graduate standing or department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
GEOL 5348. Electron Probe Microanalysis.
Electron Probe Microanalysis (2-2) Scientific basis of electron microprobe instrument and technique; laboratory demonstrations of microprobe operation; hands-on operation of microprobe; individual term project and report.
Department: Geology
3 Credit Hours
4 Total Contact Hours
2 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5362. Directed Study in Geology.
Directed Study in Geology (0-0-3) Prerequisites: Graduate standing and department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5363. Sandstone Petrography.
The interpretation of mineralogy, provenance, diagenesis and porosity of sandstones using petrographic microscopic techniques.
Department: Geology
3 Credit Hours
4 Total Contact Hours
2 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5364. Sedimentary Depositional Envir.
Sedimentary Depositional Environments (3-0) Reconstruction of ancient depositional environments in the surface and subsurface using facies analysis. Field trips are included. The class will focus on analysis of field examples. Prerequisites: GEOL 3425 with a grade of "C" or better, or instructor approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (GEOL 3425 w/C or better ) OR (GEOL 3126 w/C or better AND GEOL 3326 w/C or better)

GEOL 5365. Basin Analysis.
Basin Analysis (3-0) The study of evolution of sedimentary basins and the influences of tectonic eustacy and other factors to create a stratigraphic framework. The course includes basing analysis techniques such as backstripping, paleotemperature calculations, and sequence stratigraphy. Field trips included.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (GEOL 3425 w/C or better ) OR (GEOL 3126 w/C or better AND GEOL 3326 w/C or better)
GEOL 5367. Advanced Stratigraphy.
Advanced Stratigraphy (2-3) The history, usage, and subtleties of stratigraphy will be investigated through lectures, assigned readings, and examples. You will have your chance in the field to see if you agree with those who have defined real stratigraphic units. Prerequisites: GEOL 4362 or department approval. Laboratory fee required.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5375. Quantitative Techniques in the Geological Sciences.
Quantitative Techniques in the Geological Sciences: Introduction to methods encompassing statistical methods on multivariate data sets, time series analysis, matrix and image manipulations and mathematics, and optimization. Addresses the properties and formats of broad earth science datasets, from geochemistry and mineralogy to seismic data and through to mapping and image data.
Department: Geology
3 Credit Hours
5 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5376. Low Temperature Geochemistry.
Low Temperature Geochemistry (2-0) Chemical reactions at the earth's surface and their interpretation by thermodynamic and kinetic principles. Precipitation and dissolution, the solid-solution interface, oxidation and reduction, the distribution and circulation of elements and compounds. Course fee required.
Department: Geology
3 Credit Hours
3 Total Contact Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (CHEM 1306 w/D or better)

GEOL 5377. Principles of Geochemistry.
Principles of Geochemistry (3-0) Chemical processes involved in the distribution and migration of the elements on the earth through space and time. Principles of solution and mineral equilibria in surficial, sedimentary, hydrothermal, and igneous environments. Prerequisite: Graduate standing.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
GEOL 5378. Global Biochemical Cycles.
Introduction to the water and energy balance, and the global elemental cycles. This course will discuss Earth surface processes, different water reservoirs, environmental hot topics, and natural/anthropogenic cycles of C, P, S and other elements.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5379. Petroleum Geochemistry.
Petroleum Geochemistry (3-0) Examination of the biologic, chemical, and geologic processes involved in the accumulation of petroleum-source rocks, including diagenesis, catagenesis, and metagenesis of petroleum prone organic matter; of migration, accumulation, and maturation of liquid hydrocarbons; of and geochemical parameters useful in hydrocarbon exploration. Course fee required.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5380. Analytical Methods in Geology.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 5381. Paleoclimatology.
Investigation of scientific principles, methods and data sources used to reconstruct and interpret Earth's climate system and related paleoenvironmental factors through geological time. Emphasis is placed on the sedimentary record (marine sediments, lacustrine sediments, ice cores) of the Cenozoic Era. Actual data, scientific literature and core samples are used to describe and interpret paleoclimates through case studies.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR

GEOL 5382. Chemical Hydrology.
Chemical Hydrology (3-0) A study of the chemistry of ground and surface water. Subjects covered by the course are the chemistry of natural waters, chemical interactions between geological materials and water, groundwater contamination, and the movements of contaminants in groundwater.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of DR
GEOL 5383. Physical Hydrogeology.
Physical Hydrogeology (2-3) The first part of the class will highlight subsurface geology and groundwater flow, recharge and discharge of groundwater and the interaction between surface water bodies and groundwater. The second part of the course will focus on well hydraulics with aquifer tests to determine hydraulic parameters such as transmissivity, hydraulic conductivity, and storage in various types of aquifers. Prerequisite: Department approval.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

In-depth study of problems and issues associated with the nuclear waste disposal. The multidisciplinary legal, political and technical aspects of siting, operation, and decommissioning of reactors and the subsequent removal of source waste generated at these facilities is considered. The course examines waste removal, classification, quality assurance, and transport. Waste repository, site selection, performance assessment, operation, and entombment in various geologic media are stressed.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

Numerical Methods in Geology (3-0) Introduction to the theory and application of numerical methods (finite differences and finite elements) with application to problems in hydrotechnology, environmental geology, and structural geology. Subjects covered include general mechanics of groundwater flow, general continuum mechanics, geologic influences on model design, model limitations, convergence, calibration, and verification. Prerequisite: GEOL 5383 or department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5386. Engineering Geology.
Engineering Geology (3-0) Introduction to the application of geologic fundamentals to geotechnical engineering and the analysis of geologic processes using continuum mechanics. Subjects covered include general soil and rock mechanics, slope stability, surface water and flooding, subsidence, earthquakes, volcanoes, shore line processes, expansive soils, and geologic aspects of engineering works (dams, tunnels, buildings, etc.). Prerequisite: GEOL 3423 or GEOL 3321 or department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
GEOL 5387. Applied Quaternary Geology.
Applied Quaternary Geology (3-0) Address pertinent topics of quaternary science (including paleoclimatology, geomorphology, hydrogeology, pedology, geochronology, neotectonics, and geophysics) in an environmental context. Major bodies of environmental regulation will be introduced and the relationship of these regulations to Quaternary science will be emphasized. Environmental case studies of national significance will be an integral part of the course. Graduate students from other disciplines are encouraged. Prerequisite: Graduate standing or department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5388. Geohydrobiology.
Geohydrobiology (3-0) Study of the interaction of groundwater geology with the microbial population of the subsurface. Emphasis is placed on the transport of viruses and bacteria in various subsurface media, microbial effects on water chemistry, and the use of microbes for environmental clean-up of contaminated sites.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5389. Graduate Research in Geol. Sci.
Graduate Research in Geological Science (0-0-3)
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5392. Environmental Risk Assessment.
Environmental Risk Assessment (2-3) Risk assessment techniques to evaluate the risk to human health and the environment posed by air-, soil-, and water- contamination (both groundwater and surface water). Special emphasis will be placed on desert and wetland environments for which case studies will be presented.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5397. Geol/Mineral Resources Mexico.
Geology and Mineral Resources of Mexico (3-0) Stratigraphic and structural framework of the republic of Mexico with particular reference to the distribution of mineral resources. Field excursion required.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
GEOL 5398. Thesis.
Thesis (0-0-3)
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
Classification Restrictions:
Restricted to class of DR

Thesis (0-0-3) Prerequisite: GEOL 5398.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5398 w/P or better)

Fundamentals of Earth Science (3-3) Overview of earth science principles and processes and their relationship to environmental issues. Topics will include fundamentals of physical geology and their applications to geo hazards, engineering geology, surface and ground water, erosion, and environmental geochemistry. Atmospheric and climate topics will include global change issues. Labs will feature hands-on experience with earth materials, maps, analytical techniques, and environmental problem solving.
Department: Geology
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 5402. Fundamentals/Fld Meth in Earth Sci.
Fundamentals of Field Methods in Earth Science (3-3) Field-oriented, problem-solving studies emphasizing field identification of rocks; study of landforms and processes that create them and the use of maps, aerial photographs, and satellite imagery. Emphasis on developing observational and analytical skills and the use of multiple working hypotheses.
Department: Geology
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR
Prerequisite(s): (GEOL 5401 w/C or better)
GEOL 5405. Biostratigraphy.
Biostratigraphy (3-3) The systematic analysis of the separation and differentiation of rock units on the basis of the assemblages of fossils which they contain; special emphasis will be placed on the evolution of biothermal systems through time and problems of the establishment and utilization of biostratigraphic units and chronostratigraphic boundaries. Prerequisite: Graduate standing in Geology or Biology, or department approval. Laboratory fee required.
Department: Geology
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
Classification Restrictions:
Restricted to class of DR

GEOL 6101. Graduate Seminar.
Graduate Seminar (1-0) Required of all graduate students. Discussion of various geological topics by the faculty, graduate students, and speakers from industry and other institutions.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

GEOL 6105. Directed Study in Geology.
Directed Study in Geology (0-0-1) Restricted to major: GEOL. Prerequisites: Doctoral graduate standing and department approval.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour

GEOL 6115. Adv Topics in Geological Scienc.
Advanced Topics in the Geological Sciences (1-0) Advanced topics in paleontology and stratigraphy, mineralogy, petrology, geochemistry, structural geology and geomorphology, economic geology, and subsurface correlation. May be repeated when the topic varies. Prerequisites: Doctoral graduate standing and department approval.
Department: Geology
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

GEOL 6205. Directed Study in Geology.
Directed Study in Geology (0-0-2) Restricted to major: GEOL. Prerequisites: Doctoral graduate standing and department approval.
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

GEOL 6215. Selected Topics in Geol Scienc.
Selected Topics in Geological Sciences (2-0) Study of advanced topics in such fields as structural geology, economic geology, paleontology, petrology, and geochemistry. May be repeated for credit when the topics vary.
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
GEOL 6262. Directed Study in Geology.
Directed Study in Geology (0-0-2)
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

GEOL 6289. Graduate Research in Geol Sci.
Graduate Research in Geological Science (0-0-2)
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

GEOL 6296. Doctoral Research in Geol Sci.
Doctoral Research in Geological Sciences (0-0-2) Prerequisite: Doctoral standing or department approval.
Department: Geology
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

Computer Applications in the Earth Sciences (3-0) Principles and applications of software to earth science data analysis and modeling. Topics will include uses of Geographic Information Systems, remote sensing data types and analysis, and uses of other common PC-based applications for earth science data analysis.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 6304. Earth Structure.
Earth Structure (3-0) Fundamentals of the origin and evolution of earth structure at all scales. Topics include, geographical and geophysical methods of determining the structure of the earth, processes of rock deformation including folding and fracturing, plate tectonics, and the influence of large-scale plate tectonic processes on local earth structure.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 6305. Directed Study in Geology.
Directed Study in Geology (0-0-3) Prerequisites: Doctoral standing and department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
GEOL 6308. Planetary Geology.
Planetary Geology (3-0) A survey of the composition, evolution, and geologic features of planetary bodies and the potential for life in the solar system. Topics include origin of the solar system, planetary atmospheres, comparative planetology of terrestrial and Jovian planets, small bodies such as moons, comets and asteroids.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 6309. **Course available for reuse.**
Mineral Resources, Economics, and the Environment (3-0) Geological characteristics and classification of metallic, non-metallic, and fuel resources. Environmental consequences of mineral extraction and issues of public policy.
Department: Geology
3 Credit Hours
6 Total Contact Hours
0 Lab Hours
3 Lecture Hours
3 Other Hours

GEOL 6310. Intro Entrepreneurial Geosci.
Entrepreneurial activities in the geosciences focus on discovery and development in the energy and mineral exploration industries. This course will consist of a survey of all aspects of such activities, including but not limited to: 1) money sources, 2) the technical challenges of geology, extraction and metallurgy, and the environment mainly water, 3) social issues and ethics. Weekly discussions of current entrepreneurial events are required. Selections from the 150 professional development web courses in EduMin will enhance student learning. Written and oral products are required.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6315. Adv Topics in Geological Scien.
Advanced Topics in the Geological Sciences (3-0) Advanced topics in paleontology and stratigraphy, mineralogy, petrology, geochemistry, structural geology and geomorphology, economic geology, and subsurface correlation. May be repeated when the topic varies. Prerequisites: Doctoral standing and department approval.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6318. Petroleum Geology.
Petroleum Geology (3-0) study of the mature, origin, migration, and accumulation of petroleum, including consideration of porosity/permeability in reservoir systems, behavior of reservoir fluids, and of trap systems. Relationships between plate tectonics and petroleum provinces will be examined.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6320. Dissertation.
Dissertation (0-0-3)
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
GEOL 6321. Dissertation.
Dissertation (0-0-3) Prerequisite: GEOL 6320.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

GEOL 6322. Advanced GIST.
Advanced GIST (2-3) Advanced principals of Geographic Information Systems and Technology (GIST), with a focus on spatial analysis. Topics include combining data, map algebra, terrain modeling, spatial interaction modeling, along with basic remote sensing and digital image processing functions. The laboratory will focus on the application of a common GIS software package to science and engineering projects. A PhD level project will be required.
Keywords: GIST, earth data.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 4385 w/C or better ) OR (GEOL 5321 w/C or better ) OR (GEOL 6331 w/C or better)

GEOL 6323. Advanced Structural Geology.
Advanced topics in theoretical and applied structural geology. Includes applications of continuum mechanics to geologic problems with an emphasis on applications to real world problems. Detailed topics depend on class interest ranging from field intensive problems to theoretical modeling.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6324. Geocomputation.
This course focuses on computer coding to conduct geospatial analyses with applications in earth, environmental science, engineering, natural resources, health and social sciences. Students will learn R and Python linked with GIS. Specific topics include computer programming techniques for combining different types of geospatial data, dataset visualization, and predictive analytics. Advanced knowledge combines computer modeling development and testing, and machine learning techniques to extract patterns and predictions. A PhD level project is required. Keywords: GIST, computing.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5321 w/C or better ) OR (GEOL 6331 w/C or better)

GEOL 6325. Tectonic Geomorphology.
Students will gain an understanding of modern, quantitative geomorphology and its application to tectonics. Topics will include: process geomorphology; tectonic landforms; Quaternary geochronology; stress, strain, faults, and folds; geodesy; paleoseismology; geomorphic indices; erosion and uplift; landscape response to tectonics and landscape evolution; active tectonics and rivers; active tectonics and coastlines; mountain building. Assignments will involve readings from the literature, fieldwork, and quantitative exercises, some of which will involve basic MATLAB programming.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
GEOL 6330. Sandstone Petrography.
The interpretation of mineralogy, provenance, diagenesis and porosity of sandstones using petrographic microscopic techniques. Students will be expected to conduct independent research as an element of this course.
Department: Geology
3 Credit Hours
4 Total Contact Hours
2 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 6331. Introduction to GIST.
Introduction to GIS (2-3) Introduction to the principals and applications of Geographic Information Systems (GIS). Topics include the importance of validated databases, GIS design, data structures, producing map products, and spatial analysis. The laboratory will focus on the application of a common GIS software package to science and engineering projects. A PhD level project is required.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 6332. Carbonate Petrography & Dep. Env.
Petrographic techniques and recognition & depositional interpretation of components of carbonate rocks. Interpretation of carbonate depositional environments from the rock record. Field trips are included. The class will focus on analysis of field examples.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 6333. Spat Analysis Earth/Env Sci.
This course focuses on advanced spatial analysis in geographic information systems applicable to the environment, geological, and hydrological sciences. Students will be introduced analytical tools such as spatial data interpolation techniques, point pattern, and density analysis, as well as emerging techniques in the research literature. A PhD level project is required.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5321 w/C or better)

GEOL 6334. Sedimentary Depositional Env.
Reconstruction of ancient depositional environments in the surface and subsurface using facies analysis. Field trips are included. The class will focus on analysis of field examples.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6335. **Course May be reused.**
An introduction to acquisition, processing, and interpretation of remote sensing data acquired from both satellites and aircraft. Applications in earth and environmental sciences are stressed as is understanding how to obtain and employ the many types of data that are available. Topics are covered include basic mapping concepts, how sensors work, the structure of remote sensing data and analysis, thermal and radar techniques, data processing, and classification schemes. Laboratory work is primarily computerized exercises. A PhD level project is required.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
GEOL 6336. Sequence Stratigraphy.
Learning the supporting concepts of the sequence stratigraphic approach and utilizing practical example exercises in lab to support the understanding of these still evolving concepts. Field trips are included. The class will focus on analysis of field examples.
Department: Geology
3 Credit Hours
4 Total Contact Hours
2 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 6340. Hydrogeology.
Basic principles of hydrologic cycles and groundwater flow. Flow in confined and unconfined aquifers, pump test design and analysis, the transport of contaminants and the use of computer models to simulate saturated groundwater flow. Simple experiments will be performed to better understand the concepts of groundwater flows and pump tests. Case studies for groundwater contamination and remediation will be also discussed.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6341. **Course can be reused.**
Introduction to the principals and applications of Geographic Information Systems (GIS). Topics include the importance of validated databases, GIS design, data structures, producing map products, and spatial analysis. The laboratory will focus on the application of a common GIS software package to science and engineering projects.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

GEOL 6342. Environmental Tracers in Water.
This course discusses the principles of stable, radiogenic, and radioactive isotope chemistry of natural waters, as well as the geochemical processes affecting isotopic compositions of surface waters, soil waters, and groundwater. The course will also discuss the applications of isotopic techniques in determining groundwater residence times, flow paths and recharge conditions.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6343. Isotope Geology.
Isotope Geology (3-0) Study of the systematics and geochemistry of radiogenic and stable isotopes. The course includes both geochronology and the use of isotopes as tracers in igneous, sedimentary, and metamorphic processes.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

**Major Restrictions:**
Restricted to majors of GEOL, GEOP

This course covers topics of how the occurrence and movement of groundwater affects a wide range of geological processes, such as ore deposits, petroleum migration, upper-crustal heat transfer, earthquakes, diagenesis, and metamorphism. Examples of each topic will be examined and discussed.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
GEOL 6345. Earth Materials.
Earth Materials (2-3) Study of the minerals and rocks that comprise the crust of the earth, utilizing hand specimens and thin sections of common minerals, igneous, metamorphic, and sedimentary rocks. Materials common in the southwestern part of the U.S. will be given some emphasis.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 5401 w/C or better)

GEOL 6346. Advanced Petrology.
Advanced Petrology (2-3) Study of magmas and magma genesis in light of field, theoretical, and experimental considerations. The course includes interpretation of isotopic and trace element data. Laboratory studies focus on field trips and petrographic description of thin sections.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of GEOL, GEOP
Prerequisite(s): (GEOL 3315 w/D or better ) OR (GEOL 3115 w/D or better AND GEOL 3215 w/D or better)

A survey of topics in lunar and planetary science. The focus will be on process, in particular, a quantitative understanding of: planet formation and evolution; impacts; tectonic activity; volcanism, surface geomorphic processes, and atmospheric processes. We will discuss the histories, geologic properties, and contrasts among the terrestrial, rocky planets (Earth, the Moon, Venus, Mars, Mercury), the giant planets (Jupiter, Saturn, Uranus, Neptune), and the wide array of moons and other small bodies. An ongoing emphasis will be on the technology and techniques behind the robotic and human exploration of the solar system.

Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6365. Basin Analysis.
Basin Analysis (3-0) The study of evolution of sedimentary basins and the influences of tectonic eustacy and other factors to create a stratigraphic framework. The course includes basing analysis techniques such as backstripping, paleotemperature calculations, and sequence stratigraphy. Field trips included.
Department: Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (GEOL 3425 w/C or better ) OR (GEOL 3126 w/C or better AND GEOL 3326 w/C or better)

GEOL 6375. Quantitative Techniques in the Geological Sciences.
Quantitative Techniques in the Geological Sciences: Introduction to methods encompassing statistical methods on multivariate data sets, time series analysis, matrix and image manipulations and mathematics, and optimization. Addresses the properties and formats of broad earth science datasets, from geochemistry and minerology to seismic data and through to mapping and image data.
Department: Geology
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
GEOL 6376. Low Temperature Geochemistry.
Low Temperature Geochemistry (2-0) Chemical reactions at the earth's surface and their interpretation by thermodynamic and kinetic principles. Precipitation and dissolution, the solid-solution interface, oxidation and reduction, the distribution and circulation of elements and compounds. Course fee required.
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
**Prerequisite(s):** (CHEM 1306 w/D or better)

GEOL 6378. Global Biochemical Cycles.
Introduction to the water and energy balance, and the global elemental cycles. This course will discuss Earth surface processes, different water reservoirs, environmental hot topics, and natural/anthropogenic cycles of C, P, S and other elements.
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6381. Paleoclimatology.
Investigation of scientific principles, methods and data sources used to reconstruct and interpret Earth's climate system and related paleoenvironmental factors through geological time. Emphasis is placed on the sedimentary record (marine sediments, lacustrine sediments, ice cores) of the Cenozoic Era. Actual data, scientific literature and core samples are used to describe and interpret paleoclimates through case studies.
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6389. **Course can be reused.**
Graduate Research in Geological Science (0-0-3)
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

GEOL 6396. Doctoral Research in Geol Sci.
Doctoral Research in Geological Sciences (0-0-3) Prerequisite: Doctoral standing.
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

GEOL 6397. Geol/Mineral Resources Mexico.
Geology and Mineral Resources of Mexico (3-0) Strategraphic and structural framework of the republic of Mexico with particular reference to the distribution of mineral resources. Field excursion required.
**Department:** Geology
3 Credit Hours
3 Total Contact Hours
0 Lab Hours

Major Restrictions:
Restricted to majors of GEOL

Prerequisite(s): (GEOL 6398 w/C or better)

Fundamentals of Earth Science (3-3) Overview of earth science principles and processes and their relationship to environmental issues. Topics will include fundamentals of physical geology and their applications to geo hazards, engineering geology, surface and ground water, erosion, and environmental geochemistry. Atmospheric and climate topics will include global change issues. Labs will feature hands-on experience with earth materials, maps, analytical techniques, and environmental problem solving.
Department: Geology
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

GEOL 6402. Fundamentals/Fld Meth in Earth Sci.
Fundamentals of Field Methods in Earth Science (3-3) Field-oriented, problem-solving studies emphasizing field identification of rocks; study of landforms and processes that create them and the use of maps, aerial photographs, and satellite imagery. Emphasis on developing observational and analytical skills and the use of multiple working hypotheses.
Department: Geology
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (GEOL 5401 w/C or better)
