Psychology Courses

Courses

PSYC 5010. Quantitative Cert Suppl Req.
This course offers zero credits yet allows for the tracking of successful completion of the supplemental requirement to obtain the certificate.
0 Credit Hours
45 Total Contact Hours
0 Lab Hours
0 Lecture Hours
45 Other Hours

Major Restrictions:
Restricted to majors of CPSY, EPSY

Classification Restrictions:
Restricted to class of GR

PSYC 5302. Structural Equation Modeling.
This course will build upon knowledge of multiple regression (and factor analysis) by introducing the student to structural equation modeling (SEM). SEM is also known as covariance structure analysis, latent variable analysis, and causal modeling.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CPSY, EPSY

Classification Restrictions:
Restricted to class of GR

Prerequisite(s): (PSYC 5310 w/B or better) AND (PSYC 5311 w/B or better)

PSYC 5303. Seminar in Meta-Analysis.
This course reviews basic statistical concepts and introduces techniques and statistical procedures underlying meta-analysis. In addition, some classic meta-analytic reviews will be discussed, as well as the controversies surrounding the use of these quantitative procedures.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CPSY, EPSY

Classification Restrictions:
Restricted to class of GR
PSYC 5304. Categorical Data Analysis.
This course covers modern methods for the analysis of categorical outcome data, including multivariate contingency tables analysis, logistic regression, signal- detection theory, and multinomial modeling.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CPSY,EPSY

Classification Restrictions:
Restricted to class of GR

Prerequisite(s): (PSYC 5310 w/B or better ) AND (PSYC 5311 w/B or better)

PSYC 5305. Multilevel Modeling.
Data in the social and applied sciences are often "nested" or "clustered", with a multilevel structure. For example, jurors are nested within juries, students are nested within classrooms, and repeated measures are nested within persons. This course provides an introduction to the use of multilevel models that take into account such nesting or clustering among observations. Students will learn the basic concepts of multilevel modeling and have the opportunity to apply appropriate analytic techniques to multilevel data in a class project and homework assignments.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of GR

PSYC 5306. Attitudes-Attitude Measurement.
Attitudes and Attitude Measurement (3-0) Considers issues relevant to psychological construct assessment, including attitudes, emotion, culture, and personality.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5309. Seminar in Psychopathology.
Seminar in Psychopathology (3-0) An examination of the research related to problems in etiology, diagnosis and prognosis of the major disorders.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5315. Psychopharmacology.
Psychopharmacology (3-0) A study of current topics and recent developments in the biochemical basis of psychopathology and related strategies of psychopharmacological intervention.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
PSYC 5321. Seminar: Personality Assessment.
Seminar in Personality Assessment (3-0) Introduction to methods and issues in the evaluation of personality and to the projective and objective instruments to assess personality.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CPSY, EPSY, PSYC

Prerequisite(s): (PSYC 4301 w/D or better)

PSYC 5322. Theories/Methods Psychotherapy.
Theories and Methods of Psychotherapy (3-0) An analysis of theory, technique and research methods used in various current psychotherapies.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5323. Psychometrics.
Psychometrics (3-0) Principles of psychological evaluation, including intellectual, academic, neuropsychological, personality, attitude, and interest measures; reliability and validity; principles, methods, statistical procedures employed in developing new psychometric instruments, especially with respect to different cultural/ethnic minorities.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5325. Spc Top in Health Psychology.
Special Topics in Health Psychology (3-0) Examines relationships among psychological and cultural factors, physical health, and subjective well-being. May be repeated for credit when topics vary.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5330. Social Behavior.
Social Behavior (3-0) Theoretical and applied approaches to individual and group behavior. Topics include social cognition, attitudes and persuasion, group processes, group decision making, intra- and intergroup relations, person and group perception, and cross-cultural issues related to these social processes.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Cross-Cultural Research Methods (3-0) Consideration of the difficulties confronting casual inference in cross-cultural comparisons. The concept of equivalence is examined as it applies to populations, tests and indicators, and controlled manipulations. The role of theory in developing appropriate research strategies is emphasized. A broad range of research methods are examined for their special contributions and difficulties in cross-cultural comparisons.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
PSYC 5333. Seminar-Intell/Neuropsych Asmt.
Seminar in Intellectual and Neuropsychological Assessment (3-0) Techniques of intellectual and neuropsychological assessment Administration of major intellectual and neuropsychological instruments and interpretation and reporting of results. Introduction to neuropathological syndromes.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (PSYC 4301 w/D or better)

PSYC 5334. Foundations of Research.
Foundations of Research (3-0) Design and implementation of research, including observational methods, experiments and quasi-experimental designs, and program evaluation. Solutions to specific, commonly occurring design and statistical problems are emphasized.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5335. Research Design/Data Analysis.
Special Topics in Research Design and Data Analysis (3-0) An advanced course in data analysis and research design. Topics may include structural equation modeling (exploratory and confirmatory factor analysis, multiple group confirmatory analysis), meta-analysis, or the selection and implementation of an appropriate data analysis plan for a grant or research proposal.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (PSYC 5310 w/C or better ) AND (PSYC 5311 w/C or better)

PSYC 5342. Special Topics in Psyc. & Law.
Special Topics in Psychology and Law (3-0) Focuses on selected issues and problems where psychology and culture contribute to and has implications for the legal system and human behavior in relation to the legal system. May be repeated for credit when topic varies.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5343. Clinicl Issues in Legal Psych.
This course provides a survey of issues related to the intersection of clinical psychology and the law. Topics covered may include: competence to stand trial, the insanity defense, and issues related to adult and juvenile offenders with mental illness.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Classification Restrictions:
Restricted to class of GR

PSYC 5344. Survey of Legal Psychology.
Survey of Legal Psychology (3-0) Provides an introduction to the field of Legal Psychology, with an overview of important theoretical and applied issues. Topics may include: Eyewitness identification; juror decision making; memory and suggestibility of witnesses and victims; causes and predictors of violence, domestic violence and child abuse; decision processes in the legal system; expert testimony, and cultural issues.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Behavioral Medicine (3-0) Behavioral medicine and clinical health psychology are multi- and inter-disciplinary fields in which multiple related professions integrate to promote emotional and physical health and well being. This course will introduce students to key elements of the field, including its research and practice. Foci will include: theoretical models, assessment, differential medical and psychological diagnosis, intervention, and ethics among others. Assignments and class exercises are designed to provide students knowledge and specific tools to collaborate with other professionals, both clinically and for the purposes of research.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Public Health and Community Interventions (3-0) Reviews empirical evidence concerning the efficacy of a range of programs and interventions that are designed to increase health promoting behaviors and reduce health threatening and high risk behaviors such as teen pregnancy, drinking and driving, smoking, and alcohol and drug use. The efficacy of fear appeals, media campaigns, and related interventions will also be addressed.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5355. Seminar in General Psychology.
Seminar in General Psychology (3-0) Advanced study of contemporary problems and issues in selected topics in psychology. May be repeated with different instructors.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5356. Scientific Writing.
This course teaches students to write for publication by guiding them through the completion of at least one professional-level manuscript. Students are given the option to develop either 1) a manuscript for journal submission; 2) a thesis or dissertation; or 3) a thesis or dissertation proposal. Students are required to write daily, submit work weekly for instructor and peer review, participate in the review of other's work, and complete reading assignments from the course textbook. Potential students must meet with the course instructor before enrolling to discuss their paper topic.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5360. Clinical Internship.
Clinical Internship (0-0-6) Supervised experience with clinical techniques in an approved agency. Each 150 clock hours is equivalent to three credit hours. May be repeated until 9 hours are accumulated; however, no more than nine credit hours of PSYC 5360 will count towards the M.A. degree in Clinical Psychology. Grades in this course will not be used in computing grade point average. Pass/Fail grading option. Psychology majors only.
3 Credit Hours
6 Total Contact Hours
0 Lab Hours
0 Lecture Hours
6 Other Hours

Animal Learning and Behavior (3-0) Examination of current theories and recent developments in our understanding of the role of learning in modulating animal behavior. A broad range of animal models used to study various Psychological phenomena will be covered with an emphasis on the role of learning and memory processes in these models.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
PSYC 5372. Behavioral Neuroscience.
Behavioral Neuroscience (3-0) Advanced study of the most current information related to neurochemical and neurophysiological mechanisms by which the nervous system controls behavior. Topics will vary by may include examination of normal behaviors such as eating, water balance, sleep, learning, and memory or abnormal behaviors such as mental disorders and drug addition. Emphasis will be placed on the study and evaluation of current theories of neurochemical mechanisms and neuroanatomical substrates for the behaviors.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5374. Cognitive Psychology.
Cognitive Psychology (3-0) Examines classic and current findings and methodological approaches to the study of human cognition. Topics may include perception, attention, memory, language, thinking, problem solving, reasoning and cross-cultural issues.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5376. Developmental Psychology.
Developmental Psychology (3-0) In this course students will explore, in depth, life-span development with a focus on cognition and mental processes. Topics will include, but are not limited to, the development of reasoning, language, and the neural bases of cognitive development. Students will critically analyze seminal studies and papers from a variety of disciplines, including experimental psychology, cognitive neuroscience and animal learning and behavior.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 5385. Research Applications.
Supervised research in designated laboratories. Students may repeat course for credit.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

PSYC 5395. Thesis.
Initial work on the thesis. Psychology research course fee required.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours

PSYC 5396. Thesis.
Continuous enrollment required while work on the thesis continues.
3 Credit Hours

Classification Restrictions:
Restricted to class of DR

Prerequisite(s): (PSYC 5310 w/B or better ) AND (PSYC 5311 w/B or better)

PSYC 6306. Attitudes-Attitude Measurement.
Considers issues relevant to psychological construct assessment, including attitudes, emotion, culture, and personality.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
PSYC 6307. Appl Correlation & Regres Meth.
Reviews correlation techniques, simple and multiple regression, mediated and moderated regression, and several multivariate techniques. Applications of these techniques in psychological research in field settings are discussed.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (PSYC 4317 w/D or better)

PSYC 6308. Experimentl Design/Anal of Var.
Consideration of problems of analysis and design commonly encountered in psychological research.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (PSYC 4317 w/D or better)

PSYC 6309. Seminar in Psychopathology.
An examination of the research related to problems in etiology, diagnosis and prognosis of the major disorders.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 6312. Program Evaluation.
Examines issues in evaluation research design, implementation, utilization, and ethics. Case studies and class activities provide applied experience.

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PSYC 6313. Multilevel Modeling.
Data in the social and applied sciences are often "nested" or "clustered", with a multilevel structure. For example, jurors are nested within juries, students are nested within classrooms, and repeated measures are nested within persons. This course provides an introduction to the use of multilevel models that take into account such nesting or clustering among observations. Students will learn the basic concepts of multilevel modeling and have the opportunity to apply appropriate analytic techniques to multilevel data in a class project and homework assignments.
