Physical Therapy Courses

Courses

PT 5101. Special Topics in PT.
An elective course that further investigates special topics in physical therapy evaluation and treatment techniques. Prerequisite: Departmental approval. Restricted to MPT students.
Department: Physical Therapy
1 Credit Hour
4 Total Contact Hours
3 Lab Hours
1 Lecture Hour
0 Other Hours

PT 5102. Surface Anatomy.
Students will identify bony landmarks, tendons, muscles, joint boundaries, and ligaments of the trunk, head, and extremities. This identification will be extended to include visualization of the locations and boundaries of deeper structures including bones, deep muscles, and internal organs. Restricted to major: PT.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 5103. Patient Care Skills.
Skill in basic patient care procedures will be acquired in this laboratory course. These include correct body mechanics, infection control, wheelchair and assistive device application, gait training, patient positioning and draping, transfer techniques including handling lines and tubes and assessment of vital signs. Restricted to major: PT.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 5104. Spanish Medical Terminology.
This course is designed to improve the fluency in specific Spanish Medical Terminology commonly used in physical therapy practice. (Students will be grouped according to level of proficiency.) Restricted to major: MPT, MOT, SPLP.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 5105. Integrated Clinical Education.
Integrated Clinical Education This introduction to the clinical setting will assist students in integrating their didactic knowledge thus far in the curriculum into clinical practice. Acculturation to the profession is a key component of this course.
Department: Physical Therapy
1 Credit Hour
5 Total Contact Hours
0 Lab Hours
0 Lecture Hours
5 Other Hours
PT 5113. Clinical Education in PT.
Clinical Education in Physical Therapy I (0-0-5) Supervised clinical practice in applying basic physical therapy knowledge and skills to clients in clinical settings; develop a preliminary understanding of expected clinical behavior. Grading will be pass/fail. Restricted to major: MPT. Course deleted per department request. GC 10/98.
Department: Physical Therapy
1 Credit Hour
5 Total Contact Hours
0 Lab Hours
0 Lecture Hours
5 Other Hours
Major Restrictions:
Restricted to majors of MPT

PT 5115. Clinical Education Seminar I.
Clinical Education Seminar I (1-0) Students will be given the opportunity to discuss various aspects of the upcoming affiliation such as patient treatment, legal/ethical, management/administration and professional issues. Use of the clinical education grading tool will be presented. Grading will be pass/fail. Restricted to major MPT.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 5123. Clinical Education Seminar II.
Clinical Education Seminar II (1-0) Discussion of the PT 5214 clinical experience; topics covered include legal/ethical, administrative, professional issues and patient treatment. Grading will be pass/fail. Restricted to major: MPT.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 5150. Independent Study.
Independent Study (1-0) An elective course that may include physical therapy evaluation and treatment techniques for special populations (e.g., geriatrics, pediatrics) or in specialized settings (e.g., aqua therapy, hippotherapy), advanced anatomical dissection, gerontology, or computer operations. Restricted to major: MPT.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 5201. Special Topics in PT.
An elective course that further investigates special topics in physical therapy evaluation and treatment techniques. Prerequisite: Departmental approval. Restricted to MPT students.
Department: Physical Therapy
2 Credit Hours
NaN Total Contact Hours
0-6 Lab Hours
0-2 Lecture Hours
0 Other Hours
PT 5204. Test and Measures.
Tests and Measures: This laboratory course is an introduction to the physical therapy examination and clinical reasoning process. The components of the examination included in this course are history, systems review, and various tests and outcome measures for a variety of patient diagnoses across the lifespan.
Department: Physical Therapy
2 Credit Hours
6 Total Contact Hours
6 Lab Hours
0 Lecture Hours
0 Other Hours

PT 5207. Kinesiology for PT.
Kinesiology for Physical Therapists (1-1) Students will be given the opportunity to: 1) apply biomechanical principles to normal static and dynamic motor control of the human body; 2) recognize normal and abnormal human posture and gait; and 3) demonstrate knowledge of the structure and functions of the musculoskeletal system. Laboratory fee required. Restricted to major: MPT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
1 Lab Hour
1 Lecture Hour
0 Other Hours

PT 5212. Basic Sciences for PT.
Basic Sciences for Physical Therapists (2-0) Students will be given the opportunity to: 1) acquire basic knowledge of disease and injury at the cellular and tissue levels; 2) demonstrate an understanding of the healing process of various body tissues; 3) explain the basic concepts of pharmacotherapeutics; and 4) appreciate the importance of health maintenance behaviors in the prevention of disease and injury. Restricted to major: MPT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5214. Clinical Education in PT II.
Clinical Education in Physical Therapy II (0-0-11) Supervised clinical practice with patients in clinical settings; develop the clinical skills, behavior, and attitudes which reflect professional practice. Grading will be pass/fail. Restricted to major: MPT. Prerequisites: PT 5113 and PT 5115.
Department: Physical Therapy
2 Credit Hours
11 Total Contact Hours
0 Lab Hours
0 Lecture Hours
11 Other Hours

PT 5216. Research Methods for PT.
Basic research methods, measurement protocols, and applied statistics, for the purpose of critiquing scientific literature are introduced. Research design (experimental and nonexperimental) and common statistical tests (parametric and nonparametric) are reviewed. The course emphasis is on the critique and application of research literature. Restricted to major: MPT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5225. Specific Populations.
This course focuses on physical therapy and healthcare delivery reflective of trends in the field. Topics may include, but are not limited to health and wellness issues of specific populations like women, those who are overweight or obese, adolescents or others. Common medical problems prevalent in these populations are emphasized, as well as the impact on patient/client management and outcomes.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
PT 5226. Design/Conducting Research PT.
Designing and Conducting Research in Physical Therapy (2-0) Research proposal; written and oral presentation of research proposal to student's faculty advisor in preparation for PT 5346 and PT 5256. Restricted to major: MPT.

Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5233. Behavioral Science Topics.
Behavioral Science Topics: Psychosocial aspects of health and disability are explored from individual and population health perspectives. Topics include cultural diversity, communication, social determinants of health, health behavior change, motivational interviewing, and pain science.

Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5256. Research Project II.
Research Project II (0-0-2) Students will be given the opportunity to prepare and deliver an oral/poster presentation and final written paper on the topic of their research. Restricted to major: MPT.

Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
0 Lecture Hours
2 Other Hours

PT 5301. Special Topics in PT.
An elective course that further investigates special topics in physical therapy evaluation and treatment techniques. Prerequisite: Departmental approval. Restricted to MPT students.

Department: Physical Therapy
3 Credit Hours
NaN Total Contact Hours
0-9 Lab Hours
0-3 Lecture Hours
0 Other Hours

PT 5310. Legal/Ethical/Prof Aspec Pract.
Legal, Ethical and Professional Aspects of Practice (3-0) Students will acquire knowledge of the ethical principles, legal factors and professional behaviors which impact patient management and the physical therapy profession. Restricted to major: MPT.

Department: Physical Therapy
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5311. Modalities in PT Practice.
Modalities in Physical Therapy Practice (2-3). Thermal, mechanical and electrotherapeutic modalities and techniques commonly used in physical therapy practice are studied. Therapeutic effects of heat, cold, light, water, and electricity are assessed, and practical applications of these modalities are demonstrated.

Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
PT 5312. Pathophysiology in Rehab Sci.
Pathophysiology in Rehabilitative Science (3-0). An in-depth evaluation of disease and injury processes across the lifespan and their relevance to therapeutic rehabilitation are presented. Attention is given to all major physiological systems.

Department: Physical Therapy
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5317. Neuroscience for PT.
Neuroscience for Physical Therapists (3-0) Normal and abnormal structures and functions of the nervous system across the life span with correlation of lesions to neurodysfunction and patient presentation. Laboratory fee required. Restricted to major: MPT.

Department: Physical Therapy
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5319. Orthopedics I: Basic Ortho PT.
Orthopedics I: Basic Orthopedic Physical Therapy (2-3) Focuses on basic examination, evaluation, and management of patients/clients with common orthopedic conditions of the extremities and spine. Laboratory fee required. Restricted to major: MPT.

Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5320. Orthopedics III: Upper Quarter.
Orthopedics III: Upper Quarter (2-3) Focuses on the examination, evaluation and interventions for patients with common orthopedic conditions of the upper extremity and cervical and thoracic spine. Laboratory fee required. Restricted to major: MPT.

Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5321. Ortho Eval/Managem Lower Quart.
Orthopedic Evaluation and Management of the Lower Quarter (2-3) Pathomechanical and pathophysiological etiology of common lower quarter orthopedic problems; medical and surgical treatment of lower quarter orthopedic problems; recommendations and concerns of physicians and surgeons regarding the physical management of problems resulting from lower quarter orthopedic problems, clinical physical therapy assessment; information analysis, problem solving, clinical treatment, patient education, and management commonly used by physical therapists for clients with lower quarter orthopedic problems. Restricted to major: MPT. Laboratory fee required.

Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5324. Clinical Ed in P T IV.
Clinical Education in Physical Therapy IV (0-0-16) Supervised clinical practice; development of clinical skills, behaviors, and attitudes. Grading will be pass/fail. Restricted to major: MPT.

Department: Physical Therapy
3 Credit Hours
16 Total Contact Hours
0 Lab Hours
0 Lecture Hours
16 Other Hours
PT 5327. **Foundations for Management of Neurological Patients.**
Foundations for Management of Neurological Patients (2-3) Neurophysiological basis for the treatment alternatives frequently employed with neurological patients; principles of normal human development and the basis of motor control; and implications for each of the above to the management of neurological disabilities. Restricted to major: MPT. Laboratory fee required.

**Department:** Physical Therapy

**3 Credit Hours**

**5 Total Contact Hours**

3 Lab Hours

2 Lecture Hours

0 Other Hours

PT 5329. **Related Topics in Neurologic PT.**
Related Topics in Neurologic Physical Therapy (2-3) Students will learn about a variety of neurological conditions and treatment approaches including:
1) understanding the neurophysiological principles, indications and application of inhibitive casting 2) evaluating and treating vestibular disorders and other neurological conditions affecting balance 3) developing advanced knowledge and skill in the selection of specialized equipment and technological devices 4) gaining knowledge and skill in the performance and teaching of functional activities; 5) selecting and modifying or creating orthotic devices. Laboratory fee required. Restricted to major: MPT.

**Department:** Physical Therapy

**3 Credit Hours**

**5 Total Contact Hours**

3 Lab Hours

2 Lecture Hours

0 Other Hours

PT 5337. **Evaluation and Management of Pediatric Disorders.**
Evaluation and Management of Pediatric Disorders (2-3) Etiology and pathology of pediatric clients with neurological and orthopedic disorders; evaluation and treatment of pediatric clients with neurological and orthopedic dysfunction. Restricted to major: MPT. Laboratory fee required.

**Department:** Physical Therapy

**3 Credit Hours**

**5 Total Contact Hours**

3 Lab Hours

2 Lecture Hours

0 Other Hours

PT 5340. **Management and Finance in PT.**
Management and Finance in Physical Therapy (3-0). Management theory and fiscal discipline relevant to healthcare delivery as it relates to physical therapy are presented. Alternate means and sources of healthcare delivery are assessed, as well as administrative factors that impact care giving. Concepts and strategies applicable to the marketing and management of physical therapy practice are discussed. The principles and ethics underlying effective conflict resolution are emphasized.

**Department:** Physical Therapy

**3 Credit Hours**

**3 Total Contact Hours**

0 Lab Hours

3 Lecture Hours

0 Other Hours

PT 5346. **Research Project I.**
Research Project I (0-0-3) Students will be given the opportunity to conduct a supervised investigation and to analyze results in preparation for their final presentation. Repeat as necessary until data collection is completed. Restricted to major: MPT.

**Department:** Physical Therapy

**3 Credit Hours**

**3 Total Contact Hours**

0 Lab Hours

0 Lecture Hours

3 Other Hours

PT 5401. **Special Topics in PT.**
An elective course that further investigates special topics in physical therapy evaluation and treatment techniques. Prerequisite: Departmental approval. Restricted to MPT students.

**Department:** Physical Therapy

**4 Credit Hours**

**NaN Total Contact Hours**

0-12 Lab Hours

0-4 Lecture Hours

0 Other Hours
PT 5406. Human Anatomy for P Therapists.
Human Anatomy for Physical Therapists (2-6) Detailed study of the anatomy of muscles of the face, scalp and neck, the extremities, the trunk, the heart, the lungs, and the surface of the brain. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5407. Med Kines and Motion Analysis.
Medical Kinesiology and Motion Analysis (3-3) The kinematics and kinetics of the human body, postural control, and the basics of gait analysis are comprehensively studied. Biomechanical principles that control human movement are applied to motion analysis.
Department: Physical Therapy
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5408. Intro Patient Care/Therap Proc.
Introduction to Patient Care and Therapeutic Procedures (2-6) Students will be given the opportunity to acquire knowledge and skill in basic patient care procedures including the following areas: 1) body mechanics; 2) tests and measures: vital signs, surface palpation, goniometry and sensory testing; 3) interventions-bed mobility, positioning and draping, transfers, gait, assistive devices, wheelchair training, therapeutic exercise and massage; and 4) lines, tubes and aseptic techniques. Laboratory fee required. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5409. Adv Therapeutic Exercise/Muscl.
Advanced Therapeutic Exercise and Muscle Testing (2-6) Students will be given the opportunity to: 1) evaluate and document normal and abnormal physiological responses to various types of therapeutic exercise; 2) perform and record both manual and instrumental tests of muscle strength, length and endurance; 3) formulate functional goals and develop appropriate exercise intervention for patients with selected pathological conditions; and 4) recommend appropriate exercise parameters for healthy individuals to promote physical fitness and wellness. Laboratory fee required. Restricted to major: MPT
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5411. Neurorehabilitation I.
Neurorehabilitation I: Basic Adult Patient Management (2-6) Physical therapy and patient/client management of persons with common adult neurologic disorders. Laboratory fee required.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5412. Neurorehabilitation II.
Neurorehabilitation II: Complex Adult Patient Management (2-6) Physical therapy and patient/client management of persons with less common adult neurologic disorders with an emphasis on the more complex patient. Laboratory fee required. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours
PT 5413. Clinical Education in PT I.
This course is the 1st in a series of 4 full-time clinical experiences. A synthesis of applied knowledge acquired from the didactic curriculum applied to the physical therapy management of patients/clients is integrated in this clinical experience. Students are placed in a clinical setting that meets Doctor of Physical Therapy Program requirements. (8 weeks, full-time)
Department: Physical Therapy
4 Credit Hours
21 Total Contact Hours
0 Lab Hours
0 Lecture Hours
21 Other Hours

PT 5414. Neurorehabilitation III.
Neurorehabilitation III: Pediatric Management (3-3) The etiology and pathology of neurological and orthopedic dysfunction in the pediatric patient/client from birth through 18. Laboratory fee required. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5418. Cardiorespiratory Disorders.
Cardiorespiratory Disorders and Other Medical Conditions (3-3) Etiology and pathology of selected medical conditions including cardiovascular disorders, diabetes, cancer, burns and other wounds, renal and pulmonary disorders; therapeutic management of patients with these conditions. Restricted to major: MPT. Laboratory fee required.
Department: Physical Therapy
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5421. Orthopedics II: Lower Quarter.
Orthopedics II: Lower Quarter (2-6) Focuses on the examination, evaluation and interventions for patients with common orthopedic conditions of the lower extremity. Laboratory fee required. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours
6 Lab Hours
2 Lecture Hours
0 Other Hours

PT 5422. Related Topics/Orthopedic P T.
Related Topics in Orthopedic Physical Therapy (3-3) Principles, application and use of common orthotic appliances; peripheral nerve injuries and orthotic devices; amputations and prosthetic devices; analysis of abnormal gait; etiology and pathology of arthritis; evaluation and treatment of clients with arthritis; and electrodiagnostic procedures. Restricted to major: MPT.
Department: Physical Therapy
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

PT 5425. Clinical Education in PT II.
This course is the 2nd in a series of 4 full-time clinical experiences. A synthesis of applied knowledge acquired from the didactic curriculum and prior clinical experience applied to the physical therapy management of patients/clients are integrated in this clinical experience. Students are placed in a clinical setting that meets Doctor of Physical Therapy Program requirements. (8 weeks, full-time)
Department: Physical Therapy
4 Credit Hours
21 Total Contact Hours
0 Lab Hours
0 Lecture Hours
21 Other Hours
PT 5443. Clinical Education in PT III.
This course is the 3rd in a series of 4 full-time clinical experiences. A synthesis of applied knowledge acquired from the didactic curriculum and prior clinical experiences applied to the physical therapy management of patients/clients is integrated in this clinical experience. Students are placed in a clinical setting that meets Doctor of Physical Therapy Program requirements. (8 weeks full-time).
Department: Physical Therapy
4 Credit Hours
21 Total Contact Hours
0 Lab Hours
0 Lecture Hours
21 Other Hours

PT 5528. Eval/Managem Adult Neurol Diso.
Evaluation and Management of Adult Neurological Disorders (3-6) Etiology & pathology of disabilities resulting from central nervous dysfunction; current medical/surgical & pharmacological management of adult neurologic disorders; principles of normal development as related to adult neurological disorders; neurophysiological themes for the treatment alternatives frequently employed with the neurol. Impaired adult. Restricted to major: MPT.
Laboratory fee required.
Department: Physical Therapy
5 Credit Hours
9 Total Contact Hours
6 Lab Hours
3 Lecture Hours
0 Other Hours

PT 6101. Special Topics in PT.
An elective course that investigates topics related to physical therapy.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6102. PT Capstone Project II.
PT Capstone Project II This course continues the scholarly project begun in PT 6116. All students must produce a manuscript suitable for publication in a faculty-approved peer-reviewed journal and a poster appropriate for presentation at a state or national conference.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6103. Patient Care Skills.
Skill in basic patient care procedures will be acquired in this laboratory course. These include correct body mechanics, infection control, wheelchair and assistive device application, gait training, patient positioning and draping, transfer techniques including handling lines and tubes and assessment of vital signs.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours

PT 6106. Biophysical Agents in PT.
Thermal, mechanical, and electrotherapeutic modalities and techniques commonly used in physical therapy practice are studied. Therapeutic effects of heat, cold, sound, electricity, light, water, and mechanical interventions are assessed, and practical applications of these modalities are demonstrated.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6107. Surface Anatomy.
Students will identify bony landmarks, tendons, muscles, joint boundaries, and ligaments of the trunk, head, and extremities. This identification will be extended to include visualization of the locations and boundaries of deeper structures including bones, deep muscles, and internal organs.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6108. Integument Patient Management.
A comprehensive review of the integumentary system concentrating on the prevention of integument disruption and management of patients with open wounds, burns, and other dermatologic disorders is presented. Attention is given to the examination of and intervention for integumentary conditions across the lifespan. Restricted to major: PT.
Department: Physical Therapy
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6109. Imaging.
This course introduces the student to physical principles of imaging methods and provides a framework for interpreting medical images. Medical imaging systems include conventional X-ray, computed tomography (CT), magnetic resonance imaging (MRI), nuclear medicine (PET and SPECT), and ultrasound. Basic concepts in medical image processing and analysis, as well as medical applications, will be introduced. Restricted to major: PT.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6110. Integrative Seminar I.
Course work completed by the student across the first year of the curriculum is integrated in this seminar. Course work includes part-time clinical experiences. The student will take a comprehensive exam demonstrating their mastery of curricular content, permitting them to begin their second year of didactic coursework. Comprehensive case studies are presented to the student, who must demonstrate proficiency in patient management skills. Restricted to major: PT.
Department: Physical Therapy
1 Credit Hour
2 Total Contact Hours
0 Lab Hours
1 Lecture Hour

1 Lecture Hour
0 Other Hours

PT 6116. PT Capstone Project I.
This is the first of two Capstone courses for Doctor of Physical Therapy (DPT) students. The Capstone courses will culminate in a completed study, a manuscript suitable for submission to a peer-reviewed journal, and a poster appropriate for presentation at a scholarly conference. The Capstone courses build upon relevant research content and experiences integrated across the DPT curriculum. By the end of the first Capstone course, students will complete a review of the literature, design a study, have data collection in progress, and begin to draft early components of the manuscript.

1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6117. PT Capstone Project II.
PT Capstone Project II This course continues the scholarly project begun in PT 6116. All students must produce a manuscript suitable for publication in a faculty-approved peer-reviewed journal and a poster appropriate for presentation at a state or national conference.
Department: Physical Therapy
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6201. Law and Ethics in PT Practice.
Ethical principles and legal factors which influence healthcare in general and physical therapy practice in Texas are introduced. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6202. Professional Practice in PT.
Attributes, behaviors, and values embodied by physical therapists in the conduct of professional practice, including documentation skills, teaching and learning principles, and maintenance of effective therapeutic relationships are introduced. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6203. Differential Diagnosis.
An evaluation of the musculoskeletal, neuromuscular, cardiopulmonary, and integumentary conditions encountered by physical therapists, with emphasis on physical therapist diagnosis are presented. Recognition of signs and symptoms associated with various conditions beyond the scope of physical therapist intervention is developed, enabling the practitioner to make appropriate referrals. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
PT 6204. Special Topics in PT.
An elective course that investigates special topics related to physical therapy.
Department: Physical Therapy
2 Credit Hours
6 Total Contact Hours
6 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6205. Pharmacology in PT.
Foundational information concerning pharmacologic interventions and how drugs can be used as part of a comprehensive healthcare and rehabilitation regimen are the focus of this course. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6206. Tests and Measures.
This laboratory course is an introduction to the physical therapy examination and clinical reasoning process. Focus is on developing knowledge and skills to select and administer evidence-based tests and measures commonly used in physical therapy practice.
Department: Physical Therapy
2 Credit Hours
6 Total Contact Hours
6 Lab Hours
0 Lecture Hours
0 Other Hours

The neural, physical, and behavioral processes that govern human motor performance across the lifespan are studied. Theories of motor learning and relearning following trauma are emphasized, with attention given to how intervention and feedback variables impact the learning process. Factors that influence postural control during life are addressed. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6208. Patient Care Skills.
Students will acquire basic patient care skills in this course, including: correct body mechanics, infection control, patient positioning and draping, transfer training, gait training, lines and tubes management during mobility, low-tech assistive technology (including manual wheelchairs and gait assistive devices), vital sign assessment, and movement system analysis.
Department: Physical Therapy
2 Credit Hours
4 Total Contact Hours
3 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6209. Geriatrics.
Students will differentiate the specific considerations of an aging population with regard to disease processes and the physical therapy management of those patients. Restricted to major: PT.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
PT 6210. Clinical Exercise Physiology.
Clinical Exercise Physiology This course focuses on the acute and adaptive physiological and metabolic responses to endurance and resistance exercise for normal and clinical populations. Physical therapists must understand the responses of the cardiovascular, pulmonary, neuromuscular, musculoskeletal, endocrine, thermoregulatory, and renal systems in order to perform safe exercise testing.
Department: Physical Therapy
2 Credit Hours
4 Total Contact Hours
3 Lab Hours
1 Lecture Hour
0 Other Hours

PT 6211. Emerging Trends in PT.
Emerging Trends in PT This course focuses on emerging trends in the contemporary healthcare environment that are relevant to physical therapy practice. These include, but are not limited to, new technologies and evolving healthcare delivery models.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6212. Evidence Based Practice in PT.
Concepts developed in Research Methods, with a focus on incorporating scientific evidence into physical therapy practice, are continued. The student is exposed to the discipline of evaluating and incorporating the findings of scientific literature in the conduct of clinical practice. Students will focus on the utility of various study designs, the statistical analysis used in these studies, and how this information informs clinical practice.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6213. Advanced Exercise Prescription.
Content introduced in Exercise Physiology/Prescription will be expanded, with a focus on analysis of movement, and development and modification of safe and evidence-based exercises. This course focuses on physical therapy exercise prescription for clinical populations and for health promotion.
Department: Physical Therapy

PT 6214. PT Across the Lifespan.
Course focuses on the physical therapy management of impairments related to changes across the lifespan to the neuromuscular, musculoskeletal, cardiopulmonary, integumentary, and neurosensory (communication, cognition, affective) systems. Special emphasis will be placed on aging adults.
Department: Physical Therapy

PT 6216. Research Methods for PT.
Basic research methods, measurement protocols, and applied statistics, for the purpose of critiquing scientific literature are introduced. Research design (experimental and non-experimental) and common statistical tests (parametric and nonparametric) are reviewed. The course emphasis is on the critique and application of research literature.

PT 6233. Behavioral Science Topics.
Psychosocial aspects of health and disability are explored from individual and population health perspectives. Topics include culture, communication, social determinants of health, health behavior change, motivational interviewing, and pain science.
Department: Physical Therapy
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6301. Special Topics in PT.
An elective course that investigates special topics related to physical therapy.
Department: Physical Therapy
3 Credit Hours
9 Total Contact Hours
9 Lab Hours
0 Lecture Hours
0 Other Hours

PT 6302. PT Exercise Prescription.
PT Exercise Prescription This course focuses on physical therapy exercise prescription for healthy and clinical populations. Students will apply the physiological and metabolic concepts learned in the prior semester to the development and modification of safe and effective exercises.
Department: Physical Therapy
3 Credit Hours
NaN Total Contact Hours
0-3 Lab Hours
0-2 Lecture Hours
0 Other Hours

PT 6304. Evidence-Based Practice in PT.
Evidence-based Practice in Physical Therapy (3-0). Concepts developed in Research Methods, with a focus on incorporating scientific evidence into physical therapy practice are continued. The student is exposed to the discipline of retrieving, evaluating, and incorporating the findings of scientific literature in the conduct of clinical practice. Students will focus on the critical evaluation of new information from research findings and integration of the best research evidence into clinical practice. Restricted to major: PT.
Department: Physical Therapy

0 Lab Hours
3 Lecture Hours
0 Other Hours

PT 6307. Cardiopulmonary Patient Mgmt.
This course provides theoretical and practical instruction for the evaluation and management of physical therapy patients with cardiovascular and pulmonary disorders. Emphasis is placed on the etiology and pathology of selected cardiopulmonary medical conditions, as well as the therapeutic management of patients with these conditions. Students will create a physical therapy plan of care for selected cardiovascular and pulmonary dysfunctions using diagnostic, pharmacologic, and clinical laboratory data. Concepts of health promotion and fitness are explored. Restricted to major: PT.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours
PT 6310. Biophysical Agents in PT.
Thermal, mechanical, and electrotherapeutic biophysical agents and techniques commonly used in physical therapy practice are studied. Therapeutic effects of heat, cold, light, water, and electricity are assessed, and practical applications of these agents are demonstrated.
Department: Physical Therapy
3 Credit Hours

PT 6311. Musculoskeletal I.
Musculoskeletal I: Spine: This course focuses on the examination, evaluation, and management of patients/clients with surgical and non-surgical orthopedic conditions of the cervical, thoracic, and lumbar spines; temporomandibular joint, pelvis, sacroiliac and pubis joints including the management of orthotics.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6312. Musculoskeletal II.
Musculoskeletal II: Lower Extremity: This course focuses on the examination, evaluation, and management of patients/clients with surgical and non-surgical orthopedic conditions of the hip, knee, or foot/ankle, including the management of orthotics and prosthetics.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6313. Musculoskeletal III.
Musculoskeletal III: Upper Extremity: This course focuses on the examination, evaluation, and management of patients/clients with surgical and non-surgical orthopedic conditions of the shoulder, elbow, or wrist/hand including the management of orthotics and prosthetics.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

PT 6314. Neuromuscular Rehabilitation I.
Building on anatomical knowledge presented in Neuroscience for Health Sciences, this course offers a systematic review of clinical disorders of the central and peripheral nervous systems, with emphasis on accompanying sensorimotor sequelae. Basic neurological tests and measures are introduced along with basic treatment interventions. Restricted to major: PT.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours
0 Other Hours

The etiology and pathology of neurological and orthopedic dysfunction in the pediatric patient/client from birth through age 18 are presented. Emphasis lies in clinical application of examination and intervention for the pediatric patient in early childhood. Restricted to major: PT.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours
3 Lab Hours
2 Lecture Hours

PT 6316. Exercise Physiology/Prescr.
This course focuses on the fundamental physiology of exercise and an introduction to clinical exercise prescription. Physical therapists must understand the acute and adaptive physiological and metabolic responses to endurance and resistance exercise in normal and clinical populations. Proper understanding of cardiovascular, pulmonary, neuromuscular, musculoskeletal, endocrine, thermoregulatory, and renal system responses facilitate implementation of safe exercise testing and prescription.
Department: Physical Therapy
3 Credit Hours
5 Total Contact Hours

PT 6340. Management and Finance in PT.
Management theory and fiscal discipline relevant to healthcare delivery as it relates to physical therapy are presented. Alternate means and sources of healthcare delivery are assessed, as well as administrative factors that impact care giving. Concepts and strategies applicable to the marketing and management of physical therapy practice are discussed. The principles and ethics underlying effective conflict resolution are emphasized.

PT 6403. Clinical Education in PT I.
This course is the 1st in a series of 4 full-time clinical experiences. A synthesis of applied knowledge acquired from the didactic curriculum applied to the physical therapy management of patients/clients is integrated in this clinical experience. Students are placed in a clinical setting that meets Doctor of Physical Therapy Program requirements. (8 weeks, full-time)
Department: Physical Therapy

PT 6406. Exercise Physiology & Prescrip.
This course focuses on the acute and adaptive physiological responses to endurance and resistance exercise. Understanding the responses of the cardiovascular, pulmonary, neuromuscular, musculoskeletal, endocrine, thermoregulatory and renal systems will prepare the clinician to prescribe exercise interventions for healthy and clinical populations. Restricted to major: PT.
Department: Physical Therapy

PT 6414. Neuromuscular Rehab II.
Building on knowledge acquired in Neuromuscular Rehabilitation I, this course develops clinical approaches to the long-term management of pathology and trauma in neurologic patients. Using differential diagnosis, students develop the ability to identify neurologic disorders in real and simulated patients, with the goal of implementing an effective plan of care. Emphasis on clinical application.
Department: Physical Therapy
4 Credit Hours
8 Total Contact Hours

PT 6606. Clinical Education in PT IV.
This course is the 4th and final full-time clinical experience for the physical therapy student. Curricular objectives are culminated in a 12 week clinical experience in a setting that will advance the student's skills in a specific area of practice. Professionalism, autonomous practice, and evidence-based practice are emphasized in all practice settings. Students must integrate all aspects of patient and practice management skills within the individual's practice setting. (12 weeks-full-time)
