

BS in Electrical Engineering

Many products and services in modern society are based upon the work of electrical engineers. Electrical engineering majors learn the physics of electricity and magnetism; mathematics of circuits and systems; and engineering tools of analysis and design. Electrical engineers design, develop, build and test electrical and electronic devices and systems. For instance, electrical communication systems involving, wire, optical fiber, or wireless technology abound in radio, television, cellphones, and computer networks. Advances in electronics have made possible instrumentation systems for use in all branches of the physical and biological sciences, as well as in most areas of engineering. The reduction in cost and size of digital electronic devices has led to an explosive growth in the use of embedded computing in many application domains. Digital signal processing has enabled information extraction and processing capabilities unforeseen with analog technology in areas of video and music, environmental sciences, biomedical imaging, communication and computer systems. Electric energy is controlled and distributed by a complex transmission and distribution network that is essential to the functionality of modern society. New electric and electronic systems and devices are enabling the control of the flow of energy in a multitude of systems that affect our lives in many different ways.

The electrical engineering curriculum builds upon the physical, mathematical and electrical engineering sciences integrated with engineering tools of analysis and design to prepare an electrical engineer that can contribute to the needs of El Paso del Norte region and the nation. Students in the EE Program can specialize in thematic focus areas such as: (i) Communications, Systems, and Signal Processing, (ii) Fields, Electronics and Devices, (iii) Computer Engineering, and (iv) General Electrical Engineering. New focus areas are being developed in Biomedical Engineering, and Electric Power and Energy.

Marketable Skills

1. Ability to Identify, formulate, and solve electrical engineering problems by applying advanced math, science, and engineering principles.
2. Ability to apply engineering design to produce solutions that meet specified needs under realistic constraints.
3. Ability to communicate effectively with a range of audiences.
4. Ability to recognize ethical and professional responsibilities in engineering situations.
5. Ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BS Degree in Electrical Engineering consists of 128 semester credit hours divided into a lower division, providing diverse courses over a broad base of technical subjects, and an upper-division providing more specialized courses.

Vision

The Department of Electrical & Computer Engineering will provide programs of the highest quality to produce world-class engineers who can address challenges of the millennium.

Mission

The Electrical Engineering Program will:

- Dedicate itself to providing its students with the skills, knowledge, and attitudes that will allow its graduates to succeed as engineers and leaders.
- Maintain a vital, state-of-the art research enterprise that provides its students and faculty with opportunities to create, interpret, apply and disseminate knowledge.
- Prepare its graduates for life-long learning to meet intellectual, ethical, and career challenges.
- Recognize and act upon the special mandate to make high-quality engineering education available to the residents of El Paso and the surrounding region.

Educational Objectives

As individuals and as members of teams, our graduates will be able to:

- Our graduates should apply their knowledge and skills to electrical engineering practice or to pursue advanced education successfully as demonstrated by some of the following:
 - Completion of certificates, graduate degrees, or professional licensing
 - Sustained employment and/or full-time graduate school in electrical engineering or related area
 - Advancement and/or recognition in employment
- Our graduates should demonstrate creativity, leadership and entrepreneurial thinking in the practice of engineering as demonstrated by some of the following

- Leadership roles in their organizations, their profession, and/or in society
- Effective participation in disciplinary and multidisciplinary teams
- Successful development and/or improvement of products, processes, and/or systems
- Our graduates should engage successfully in professional communication as demonstrated by some of the following
 - Publication of technical articles, engineering reports, and/or proposals
 - Effective participation in disciplinary and multidisciplinary teams
 - Presentation of their work at professional meetings or conferences
- Our graduates should exhibit social and professional responsibility in the practice of engineering as demonstrated by some of the following
 - Involvement in community service
 - Evidence of commitment to lifelong learning
 - Membership in professional organizations

Student Outcomes

These Educational Objectives are supported by the following student outcomes. Attainment of these outcomes prepares program graduates to enter the professional practice of engineering.

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Fast Track

The Fast-Track Program (<http://catalog.utep.edu/admissions/undergraduate/fast-track/#text>) enables outstanding undergraduate UTEP students to receive both undergraduate and graduate credit for up to 15 hours of UTEP course work as determined by participating Master's and Doctoral programs.

Not all undergraduate programs have elected to participate in the Fast Track option, so students should see their departmental graduate advisor for information about requirements and guidelines. A list of courses that have been approved for possible use at the graduate level is found here (<http://catalog.utep.edu/admissions/undergraduate/fast-track/#fasttrackcoursestext>).

Fast-Track Combined BSEE/Master Program in Electrical or Computer Engineering

Students with at least 90 hours accumulated toward their BSEE degree and a cumulative GPA of at least 3.30 may be eligible for admission into the fast-track BSEE/Master Program. Students admitted to this program take graduate classes that count both toward graduate degree requirements and undergraduate degree requirements, for up to 15 credit hours of ECE graduate courses per approval of the undergraduate and graduate advisors. Eligible ECE graduate courses come from a list approved for fast-track by the ECE Faculty. Students must earn a B or better in the graduate course to count as graduate credit for the Master of Science in Electrical Engineering or for the Master of Science in Computer Engineering. If the grade is a C, it will not count towards the graduate degree but will still count towards the undergraduate degree.

University Core Curriculum (A program may recommend specific courses. All courses require a C or better.)

I. Communication (six hours)

Code	Title	Hours
Courses in this category focus on developing ideas and expressing them clearly, considering the effect of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience. Course objectives for this component are: Critical Thinking Skills, Communication Skills, Teamwork, and Personal Responsibility.		
Select six hours of the following:		6
For students whose secondary education was in English:		
COMM 1611	Written and Oral Communication	

ENGL 1313	Writing About Literature	
RWS 1301	Rhetoric & Composition I	
RWS 1302	Rhetoric & Composition 2	
RWS 1601	Rhetoric, Composition & Comm	
For students whose secondary education was not in English:		
ESOL 1311	Expos Engl Compos-Spkr Esl	
ESOL 1312	Res & Crit Writng Spkr Esl	
TOTAL HOURS		6

II. American History (six hours)

Code	Title	Hours
Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role. Course objectives for this component are: Critical Thinking Skills, Communication Skills, Social Responsibility, and Personal Responsibility.		
HIST 1301	History of U.S. to 1865	3
HIST 1302	History of U.S. Since 1865	3
TOTAL HOURS		6

III. Language, Philosophy & Culture (three hours)

Code	Title	Hours
Courses in this category focus on how ideas, values, beliefs, and other aspects of culture express and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures. Course objectives for this component are: Critical Thinking Skills, Communication Skills, Social Responsibility, and Personal Responsibility.

Code	Title	Hours
BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING		
FRESHMAN		
Fall		
RWS 1301	Rhetoric & Composition I	3
EL 1301 or COMM 1302	Eng Innovation and Leadership Business/Profession Comm	3
CS 1320	Computer Programming Sci/Engr	3
MATH 1411	Calculus I	4
ECE 1300 & ECE 1100	Intro to Electr/Comp Eng and Lab for ECE 1300	4
Spring		
HIST 1301	History of U.S. to 1865	3
RWS 1302	Rhetoric & Composition 2	3
PHYS 2320 & PHYS 2120	Introductory Mechanics and Laboratory for PHYS 2320	4
ECE 2303 & ECE 2103	Digital Systems Design I and Lab for ECE 2303	4
MATH 1312	Calculus II	3
SOPHOMORE		
Fall		
CE 2326	Econ for Engrs & Scientists	3
PHYS 2321 & PHYS 2121	Introductory Electromagnetism and Laboratory for PHYS 2321	4
ECE 2300	Software Design I	3
ECE 2301	Electric Circuits I	3
MATH 2326	Differential Equations	3
Spring		
HIST 1302	History of U.S. Since 1865	3
ECE 2302 & ECE 2102	Electric Circuits II and Lab for ECE 2302	4
ECE 2304 & ECE 2104	Microprocessor Systems I and Lab for ECE 2304	4
ECE 3331	Discrete Time Signals & Sys	3
MATH 2313	Calculus III	3
JUNIOR		
Fall		
ECE 3341 & ECE 3141	Electronics I and Lab for ECE 3341	4
ECE 2331	Cont. Time Signals & Systems	3
ECE 3343	Applied Quantum Mech for EE	3
ECE 3320	Electromagnetic Field Theory	3
MATH 3323	Matrix Algebra	3
Spring		

Creative Arts (Core)		3
ECE 3344	Fund. of Semiconductor Dev	3
