

BS in Microbiology

The BS in Microbiology is a specialized implementation of the Biomedical Science Concentration within the Department of Biological Sciences that is modeled on the degree recommendations of the American Society of Microbiology. The Microbiology curriculum stresses the sciences of chemistry, biology, physics, and mathematics essential to the study of microbiology providing a strong foundation for medical and graduate school biomedical studies in infectious disease and immunology, and for advanced studies in environmental and industrial microbiology. The stringency of the program and the extensive laboratory training also prepares graduates for entry level positions in medical and industrial microbiology and has sufficient flexibility to allow preparation for graduate study or for employment in microbiological and allied fields.

Marketable Skills

1. Communication: Reach mutual understanding through the effective exchange of information, ideas, and feelings.
2. Critical thinking: Analyze and evaluate issues in order to solve problems and develop informed opinions.
3. Organization: Use resources effectively and efficiently in order to stay focused on different tasks.
4. Problem-solving: Find solutions to difficult or complex issues.
5. Research: Be able to search, investigate and critically analyze information in response to a specific research question.
6. Time management: Prioritize goals and organize time to be more productive and efficient.

Learning Outcomes

1. All students will have basic knowledge about facts and principles of microbiology, cell biology, and molecular biology.
2. Students will develop critical thinking skills and apply those skills to solve problems of scientific relevance.
3. Students will understand and employ microbiology, cell biology, molecular biology techniques in a research laboratory setting (e.g. accurate pipetting).
4. Students will carry out basic experiments in the laboratory, understand experimental controls, and analyze data to make rational conclusions.

The requirements for the BS degree in Cellular and Molecular Biochemistry consist of the general College of Science requirements: completion of at least 120 semester credit hours, a minimum of 37 of which must be in upper-division coursework, and completion of the University's General Education Core, which includes mathematics requirements MATH 1411. In addition, MATH 1312 or STAT 2480 is required.

For more information contact CORE (<https://www.utep.edu/science/core/>) advisors.

Fast Track

The Fast-Track Program (<http://catalog.utep.edu/admissions/undergraduate/fast-track/#text>) enables outstanding undergraduate UTEP students to receive both undergraduate and graduate credit for up to 15 hours of UTEP course work as determined by participating Master's and Doctoral programs.

Not all undergraduate programs have elected to participate in the Fast Track option, so students should see their departmental graduate advisor for information about requirements and guidelines. A list of courses that have been approved for possible use at the graduate level is found here (<http://catalog.utep.edu/admissions/undergraduate/fast-track/#fasttrackcoursestext>).

All courses require a C or better

I. Communication (six hours)

Code	Title	Hours
------	-------	-------

The objective of the communication component is to enable the student to communicate effectively in clear and correct prose or orally in a style appropriate to the subject, occasion, and audience.

Select six hours of the following: 6

For students whose secondary education was in English:

COMM 1611	Written and Oral Communication	
ENGL 1313	Writing About Literature	
RWS 1301	Rhetoric & Composition I	
RWS 1302	Rhetoric & Composition 2	
RWS 1601	Rhetoric, Composition & Comm	
For students whose secondary education was not in English:		
ESOL 1311	Expos Engl Compos-Spkr Esl	
ESOL 1312	Res & Crit Writng Spkr Esl	
Total Hours		6

II. American History (six hours)

Code	Title	Hours
The objectives of the history component are to expand students' knowledge of the origin and history of the U.S., their comprehension of the past and current role of the U.S. in the world, and their ability to critically evaluate and analyze historical evidence. U.S. history courses (three hours must be Texas history) include:		
HIST 1301	History of U.S. to 1865	3
HIST 1302	History of U.S. Since 1865	3
Total Hours		6

III. Language, Philosophy & Culture (three hours)

Code	Title	Hours
The objective of the humanities component is to expand students' knowledge of the human condition and human cultures, especially in relation to behaviors, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature and philosophy, students engage in critical analysis and develop an appreciation of the humanities as fundamental to the health and survival of any society.

IV. Mathematics (three hours)

Code	Title	Hours
The objective of the mathematics component is to develop a quantitatively literate college graduate. Every college graduate should be able to apply basic mathematical tools in the solution of real-world problems.		
Select one of the following:		
MATH 1309	College Algebra	3
MATH 1310	Trigonometry and Conics	
MATH 1319	Math in the Modern World	
MATH 1320	Math for Social Sciences I	

MATH 1411	Calculus I
MATH 1508	Precalculus ^{1,2}
MATH 2301	Math for Social Sciences II
STAT 1380	Statistical Literacy
STAT 2480	Elementary Statistical Methods

1 A higher-level course in the calculus sequence can be substituted.

2 TCCN MATH 1314 will also satisfy this requirement.

V. Life & Physical Sciences (six hours)

Code	Title	Hours
------	-------	-------

The objective of the study of the natural sciences is to enable the student to understand, construct, and evaluate relationships in the natural sciences, and to enable the student to understand the bases for building and testing theories. The courses listed are for non-majors; the major courses in the discipline can be substituted for the non-major sequence. A minimum of two semesters of lecture and one semester of laboratory associated with one of the courses, or two semesters of combined (3 credit) lecture-laboratory courses (Only six hours apply toward the required 42.):
