Computer Science Courses

Courses

CS 1101. Intro to Computer Science Lab.
Introduction to Computer Science Lab First course for students majoring in Computer Science. Introduction to problem solving with computers, including representation, control structures, and software development methods; closed laboratory and programming assignments in a high-level language; programming environments; social and ethical aspects of computing. Prerequisite: MATH 1508 or MATH 1411 with "C" or better.
Department: Computer Science
1 Credit Hour
3 Total Contact Hours
3 Lab Hours
0 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better)
Corequisite(s): CS 1301

CS 1110. Intro to Problem Solving.
Intro to Problem Solving: The student will learn a systematic approach to problem solving, including questioning, reflecting, consideration of different perspectives and defending the selected solution.
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours

Major Restrictions:
Restricted to majors of CS, LDCS

CS 1120. Computational Thinking.
Computational Thinking: Problem solving using computational thinking involves formulating problems in a manner that enables the use of computers and related tools to find solutions. The activities will focus on developing abilities to identify specific modules in a difficult problem, and build solutions using a bottom-up method.
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Prerequisite(s): (CS 1101 w/C or better AND CS 1301 w/C or better ) OR (CS 1401 w/C or better)

CS 1190. Special Topics in Computing.
Special Topics in Computing Selected topics of current interest in computer science, accessible by any calculus ready student. May be repeated for credit when topic varies.
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better)
CS 1191. Special Topics in Computing.
Special Topics in Computing: Selected topics of current interest in computer science, accessible by any calculus ready student.
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Major Restrictions:
Restricted to majors of CS, LDCS
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1310 w/C or better)

CS 1290. Special Topics in Computing.
Special Topics in Computing Selected topics of current interest in computer science, accessible by any calculus ready student. May be repeated for credit when topic varies.
Department: Computer Science
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better)

CS 1291. Special Topics in Computing.
Special Topics in Computing: Selected topics of current interest in computer science, accessible by any calculus ready student.
Department: Computer Science
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CS, LDCS
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1310 w/C or better)

CS 1301. Intro to Computer Science.
Intro to Computer Science: Topics include basic concepts of algorithms, basic computer organization, impacts of computing, and implementation of solutions to computing problems in a high-level programming language. Students will build problem-solving skills, team skills, critical-thinking skills, and professionalism.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1310 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better)
Corequisite(s): CS 1101
CS 1310. Intro-Computational Thinking.
Introduction to Computational Thinking: [TCCN COSC 1301] An introduction to computational thinking: Computational thinking is the process of converting a real-world problem into software-based approach for solving it. Towards that goal, students are analytically engaged in the creation of programs that address the challenges of drawing shapes, animating familiar phenomena, and generating graphical representations of problems of relevance to their academic major. Students learn analytical skills that are transferrable to many other disciplines.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

(Common Course Number COSC 1330). Introduction to computers and problem solving with digital computers. A procedural programming language will be utilized to solve scientific and engineering oriented problems. Visualization methods will also be used to provide an experimental approach to problem solving. Prerequisite: MATH 1508 with a grade of "C" or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2326 w/C or better ) OR (MATH 2313 w/C or better)

CS 1401. Intro to Computer Science.
Introduction to Computer Science: [TCCN COSC 1436] First course for students majoring in Computer Science. Introduction to problem solving with computers, including representation, control structures, and software development methods; closed laboratory and programming assignments in a high-level language; programming environments; social and ethical aspects of computing.
Department: Computer Science
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better)

Computer Programming for Scientists and Engineers (3-3) Introduction to computers and problem solving with digital computers. A procedural programming language will be utilized to solve scientific and engineering oriented problems. Visualization methods will also be used to provide an experimental approach to problem solving. Prerequisite: MATH 1508 or MATH 1411 each with a grade of "C" or better.
Department: Computer Science
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
CS 2101. Discrete Structures I.
Discrete Structures I: Topics include propositional logic, proofs, sets, functions, and relations, counting, inductio and recursion. This course emphasizes the connections of it content with Computer Science.
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
1 Lecture Hour
0 Other Hours
Major Restrictions:
Restricted to majors of CS, LDCS
Prerequisite(s): (MATH 1508 w/C or better ) OR (MATH 1411 w/C or better ) OR (MATH 2301 w/C or better ) OR (MATH 1312 w/C or better ) OR (MATH 2313 w/C or better ) OR (MATH 2326 w/C or better ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXOI score of 1 ) OR (SXTR score of 1 ) OR (MATH 1310 w/C or better)

CS 2202. Discrete Structures II.
Discrete Structures II: Topics include induction and recursion, fundamental techniques of counting, common classes of graphs and trees, and models that use graphs and trees. This course ephasizes the connections of its content with Computer Science.
Department: Computer Science
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 1411 w/C or better ) AND (CS 2101 w/C or better)

CS 2210. Algo. Thinking in Prob. Solv..
Algorithmic Thinking in Problem Solving: Provide practice on solving problems employers use during interviews through development of analytical, coding and communication skills.
Department: Computer Science
2 Credit Hours
2 Total Contact Hours
0 Lab Hours
2 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 2302 w/C or better ) AND (MATH 2300 w/C or better ) OR (CS 2202 w/C or better)

CS 2302. Data Structures.
Data Structures: [TCCN COSC 2336] Abstract data types, representation of data using sets, lists trees and graphs. Storage allocation and collection techniques.
Department: Computer Science
3 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 2401 w/C or better ) OR (MATH 2300 w/C or better ) OR (CS 2101 w/C or better AND CS 2202 w/C or better)

Programming and Algorithms: [TCCN COSC 1437] Second course for students majoring in Computer Science. Fundamental computing algorithms including searching and sorting; elementary abstract data types including linked lists, stacks, queues and trees; introduction to algorithm analysis.
Department: Computer Science
4 Credit Hours
6 Total Contact Hours
3 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 1401 w/C or better ) OR (CS 1101 w/C or better AND CS 1301 w/C or better)
CS 2402. **Data Structures.**

Data Structures (3-3) The definition and implementation of abstract data types; representation of data using sets, lists, trees, and graphs; the design and implementation of traversal, search, and sort algorithms; and the space and time analysis of algorithms. Prerequisite: CS 2401 and MATH 2300 each with a grade of "C" or better.

**Department:** Computer Science

**4 Credit Hours**

**6 Total Contact Hours**

- 3 Lab Hours
- 3 Lecture Hours
- 0 Other Hours

CS 3190. **Special Topics in Programming.**

Special Topics in Programming (1-0) Essential constructs and usage of either a programming language (e.g., C, PROLOG, Haskell, C++, Perl), an operating system (e.g., Unix), or advanced topics within a particular language or OS (e.g., CGI programming, Java GUI programming, Windows GUI programming, Motif). Intended to allow advanced students to acquire working proficiency quickly. The language/OS will vary. May not be counted toward the major in Computer Science. May be repeated for credit when the topic differs. Prerequisite: CS 3360 with a grade of "C" or better.

**Department:** Computer Science

**1 Credit Hour**

**1 Total Contact Hour**

- 0 Lab Hours
- 1 Lecture Hour
- 0 Other Hours

CS 3195. **Junior Professional Orientation.**

Junior Professional Orientation (1-0) Introduction to the Computer Science profession with a special emphasis on professional ethics. Required of all students prior to graduation. Prerequisite: CS 2302 with a grade of "C" or better.

**Department:** Computer Science

**1 Credit Hour**

**1 Total Contact Hour**

- 0 Lab Hours
- 1 Lecture Hour
- 0 Other Hours

**Prerequisite(s):** (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 3320. **Comp Arch II: Adv. Design /Imp.**

Computer Architecture II: Advanced Computer Design and Implementation (3-0) The organization and structure of the major hardware components of computers; the mechanics of information transfer and control within digital computer systems. Restricted to Majors: LDCS Prerequisite: CS 3432 and EE 2369 each with a grade of "C" or better.

**Department:** Computer Science

**3 Credit Hours**

**3 Total Contact Hours**

- 0 Lab Hours
- 3 Lecture Hours
- 0 Other Hours

CS 3330. **Prob Oriented Program Language.**

Problem Oriented Programming Language (3-0) A detailed study of one or more modern programming languages (C, ADA, MODULE-2, LISP, PROLOG, ETC), which is of particular value in a student's area of interest. Languages will be taught in rotation. May be repeated once for credit as a technical elective when the application area of the programming language differs. Prerequisite: CS 3202 or CS 3333 with grade of "C" or better.

**Department:** Computer Science

**3 Credit Hours**

**3 Total Contact Hours**

- 0 Lab Hours
- 3 Lecture Hours
- 0 Other Hours
Advanced Object-Oriented Programming (3-0) An in-depth exposure to the object-oriented programming paradigm, which builds upon programming experience gained in lower-level computer science classes. Emphasis on programming in an object-oriented language with which students are already familiar, and on requirements, testing, code reading, and comprehension. Prerequisite: CS 2302 with a grade of "C" or better.

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 3333. Basic Concepts In Computer Sci.
Basic Concepts In Computer Science (3-0) Introduction to the fundamentals of data types (lists, trees, sets, graphs, etc.), searching and sorting. Context-free languages, finite automata, and turing machines. May not be counted toward the major in computer science. Prerequisites: CS 1420 or CS 1401 with grade of "C" or better.

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

CS 3335. Systems Programming.
Systems Programming (3-0) The design and implementation of the programming environment including editors, compilers, loaders and linkers, debuggers and operating systems. Prerequisites: CS 2302 with grade of "C" or better.

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Automata, Computability and Formal Languages (3-0) Theoretical computing models and the formal languages they characterize: finite state machines, regular expressions, pushdown automata, context-free grammars, Turing machines and computability. Capabilities and limitations of each model, and applications including lexical analysis and parsing. Restricted to majors: CS, EECE Prerequisite: (CS 2302 AND MATH 2300) OR (CS 2401 AND MATH 2300).

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (CS 2302 w/C or better AND MATH 2300 w/C or better ) OR (CS 2401 w/B or better AND MATH 2300 w/B or better ) OR (CS 2202 w/C or better AND CS 2302 w/C or better ) OR (CS 2202 w/B or better AND CS 2401 w/B or better)

Design features of modern programming languages, including flow control mechanisms and data structures; techniques for implementation of these features; practice programming in several representative languages.

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)
Computer Graphics (3-0) An introduction to representation and display of graphical information including line, character and curve generation. Emphasis on two-dimensional techniques. Restricted to majors: CS, EECE. Prerequisites: CS 2302 and MATH 3323 each with a grade of "C" or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

CS 3432. Computer Organization.
Computer Architecture I: Basic Computer Organization and Design (3-3) Compile and assembly processes; machine organization; fetch/decode/execute process; symbolic coding of instructions and data, including instruction types, formats, and addressing modes; implementation of data and control structures, subroutines, and linkage; and input/output handling at the assembly level, including memory-mapped I/O and interrupt and exception handling. Prerequisites: (CS 2302 and EE 2369 and EE 2169 and MATH 2300) OR (CS 2401 and EE 2369 and EE 2169 and MATH 2300).
Department: Computer Science
4 Credit Hours
4 Total Contact Hours
0-3 Lab Hours
0-3 Lecture Hours
0-3 Other Hours

Prerequisite(s): (CS 2302 w/C or better AND EE 2169 w/C or better AND EE 2369 w/C or better AND MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) OR (CS 2401 w/B or better AND EE 2169 w/B or better AND EE 2369 w/B or better AND MATH 2300 w/B or better ) OR (CS 2202 w/B or better)

CS 4171. Computer Science Problems.
Computer Science Problems (0-0-1) Original investigation of special problems in the student's area of interest, the problem being selected by the student in consultation with the instructor and with the permission of the chairman of the computer science department. May be repeated credit. Major Restrictions: CS Prerequisite: Senior standing in computer science and department approval
Department: Computer Science
1 Credit Hour
1 Total Contact Hour
0 Lab Hours
0 Lecture Hours
1 Other Hour

Major Restrictions:
Restricted to majors of CS

Classification Restrictions:
Restricted to class of SR

CS 4173. Computer Science Internship.
A professional internship in an industrial, governmental, or other organization in which a student engages in authentic workplace experiences. To receive a passing grade, the student must submit a written report from the Internship supervisor to the undergraduate program director that presents the results of the internship, including a description of applied and acquired skills. Prerequisites: CS 3331 w/a grade of C or better AND departmental approval.
Restricted to Major of CS.
Department: Computer Science
1 Credit Hour
6.66 Total Contact Hours
0 Lab Hours
0 Lecture Hours
6.66 Other Hours

Major Restrictions:
Restricted to majors of CS

Prerequisite(s): (CS 3331 w/C or better)
CS 4175. Parallel Computing.
Parallel Computing: The course covers fundamentals of parallel computing, including principles of parallel decomposition, processes communication and coordination, architecture, parallel algorithms, analysis, and programming.
**Department:** Computer Science
**1 Credit Hour**
**1 Total Contact Hour**
0 Lab Hours
1 Lecture Hour
0 Other Hours
**Prerequisite(s):** (CS 3331 w/C or better AND CS 3432 w/C or better)

CS 4177. Software Vulnerabilities.
Software Vulnerabilities Hands-on workshop-style course covering common software security vulnerabilities. The course will consist of 10 workshops, each covering a particular current software vulnerability.
**Department:** Computer Science
**1 Credit Hour**
**2 Total Contact Hours**
2 Lab Hours
0 Lecture Hours
0 Other Hours
**Prerequisite(s):** (CS 3432 w/C or better)

CS 4181. Undergraduate Seminar.
Undergraduate Seminar (1-0) Advanced topics in computer science. Presentation and discussion of various topics in computer science by faculty, students, speakers from other institutions and from industry.
**Department:** Computer Science
**1 Credit Hour**
**1 Total Contact Hour**
0 Lab Hours
1 Lecture Hour
0 Other Hours

Introduction to Computer Science Research (0-0-1) Introduction to the basic skills needed for research, including oral presentation skills, report writing skills, comprehension, critiquing and feedback skills, teamwork skills, and research skills such as formulating a problem, planning research efforts, and managing time. These skills are taught in a group environment as part of a research project. Participation requires departmental approval and permission of the faculty member(s) supervising the student's research. Prerequisite: Department approval.
**Department:** Computer Science
**1 Credit Hour**
**1 Total Contact Hour**
0 Lab Hours
0 Lecture Hours
1 Other Hour

CS 4195. SR Professional Orientation.
Senior Professional Orientation (1-0) Continuation of CS 3195. Further introduction into the Computer Science profession with emphasis on job placement. Senior standing required. May not be counted toward the major in Computer Science. Major Restriction: CS
**Department:** Computer Science
**1 Credit Hour**
**1 Total Contact Hour**
0 Lab Hours
1 Lecture Hour
0 Other Hours
CS 4273. Computer Science Internship.
A professional internship in an industrial, governmental, or other organization in which a student engages in authentic workplace experiences. To receive a passing grade, the student must submit a written report from the internship supervisor to the undergraduate program director that presents the results of the internship, including a description of applied and acquired skills. Prerequisites: CS 3331 w/a grade of C or better AND departmental approval. Restricted to Major of CS.
Department: Computer Science
2 Credit Hours
13.33 Total Contact Hours
0 Lab Hours
0 Lecture Hours
13.33 Other Hours

Prerequisite(s): (CS 3331 w/C or better)

CS 4310. Software Eng: Requirements Eng.
Software Engineering: Requirements Engineering (3-0) Methodologies, approaches, and techniques associated with software requirements analysis and definition; process for defining requirements of a system including feasibility study, requirements elicitation, formal specification, modeling, validation, verification, and documentation; other topics include cooperative teamwork and project management; first semester of a two-semester capstone project in which students work with a customer to capture and specify requirements for a real-world application. Prerequisites: CS 3331 with a grade of “C” or better and departmental approval.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (CS 3331 w/C or better)

CS 4311. Software Eng: Design & Implmnt.
Software Engineering: Design and Implementation (3-0) Methodologies, approaches, and techniques associated with software design, implementation, and testing of a software system; other topics include cooperative teamwork, project management, and documentation; second semester of a two semester capstone project in which students design and implement a real-world application specified in CS4310. Prerequisite: CS 4310 with a a grade of “C” or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (CS 4310 w/C or better)

CS 4316. Computer Networks.
Computer Networks (3-0) Introduction to data communications. Covered topics include: data transmission, link control, encoding, multiplexing, switching, network topologies, address resolution, protocol layering, routing methods, data security, and distributed systems. Prerequisite: CS 2302 and CS 3432 each with a grade of “C” or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (CS 2302 w/C or better AND CS 3432 w/C or better)
CS 4317. Human-Computer Interaction.
Human-Computer Interaction (3-0) Models and methods of human-computer interaction. Human perception and cognition; properties of input and output devices; interface development methods, including task analysis, use-centered design, prototyping; evaluation techniques such as heuristic evaluation, cognitive walkthroughs, usability testing; design for the desktop, the Web and mobile devices; user interface programming. Prerequisite: CS 2302 with a grade of "C" or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 4318. Wireless Networks.
Wireless Networks This introductory course in mobile and wireless networks provides a mixture of theoretical, engineering, and practical topics in contemporary wireless systems. The course covers fundamental techniques in design and operation of the second, third, and fourth generations of wireless LANs, and it places a significant emphasis on the design of security-related features within wireless networks.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 4320. Artificial Intelligence.
Artificial Intelligence (3-0) Introduction to basic concepts and techniques of artificial intelligence including representation, search strategies, expert systems and applications. Restricted to majors: CS, EECE. Prerequisite: CS 2302 with a grade of "C" or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 4330. Mobile Application Development.
Introduction to mobile applications, object-oriented application framework, and design patterns; core concepts of mobile platforms, such as Android and iOS; and design and development of (secure) mobile applications. Specific topics include user interface, process creation and life- cycle events, local and remote process services, location- based facilities, accelerometer and other on-device sensors, messaging and networking, sound and multimedia, and security facilities. Prerequisite: CS 3331 with a grade of C or better. Restricted to Majors of CS and EE.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CS, EE

Prerequisite(s): (CS 3331 w/C or better)
CS 4339. Secure Web-Based Systems.
An introduction to web-based technology and applications, emphasizing development and security. Topics may include: client- and server-side programming; web services; e-business models; security and privacy issues; the provisioning, development, and deployment of web sites, including dynamic web content generation and the management of database back ends; legal and business aspects; and relevant legal aspects.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/c or better ) AND (CS 2302 w/C or better)

CS 4342. Database Systems.
Introduction to database fundamentals (e.g., relational algebra), data models (e.g., entity-relationship model, relational model), the use of database management systems with a course project (e.g., database design and implementation, query processing), new paradigms for data management (e.g., non-relational data models), data integrity, privacy, and security.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/c or better ) AND (CS 2302 w/C or better)

Computer Security (3-0) General concepts and applied methods of computer security, especially as they relate to confidentiality, integrity, and availability of information assets. Topics include system security analysis; access control and security models; identification and authentication; protection against external and internal threats; communication protocols; Internet security. Prerequisite: CS 3432 with a grade of "C" or better.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (CS 3432 w/C or better)

CS 4352. Compilers and Interpreters.
Compilers and Interpreters (3-0) The structure of compilers and interpreters: lexical syntax and semantic analysis, formal description of programming languages, parsing techniques, intermediate languages, optimization and code generation. Restricted to majors: CS, EECE. Prerequisites: CS 3350 with "C" or better.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Machine Learning Machine Learning studies the development of programs that can improve in the performance of a task with experience. For many difficult problems, such as speech understanding, image classification, and text analysis, solutions based on machine learning outperform all others proposed to date. In this course we will study several of the most commonly used machine learning algorithms, their application to problems in several areas of interest, and their quantitative evaluation. We will also discuss current research issues in machine learning. Each student will do a research project related to a problem of his/her interest.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/c or better ) AND (CS 2302 w/C or better)
CS 4362. Data Mining.
Data Mining The focus of this course is exploration of data to discover knowledge. The topics covered in this course are useful to gain insights from big data and to develop expertise in mining massive datasets. In addition to the state-of-the-art algorithms used in the knowledge discovery process, the course will cover recent literature on big data analytics. Along with regular lectures and discussions in this course, there will be a semester-long group-project and hands-on activities, especially on algorithm design, tool development, and data analysis.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 4363. Computer Vision.
Computer Vision Computer Vision is concerned with the development of programs that enable computers to extract useful information from digital images. In this course we will study techniques for solving several of the most relevant problems in computer vision, including three-dimensional reconstruction, object detection, object recognition, surveillance, robot navigation, medical image analysis, and computational photography. Each student will do a research project related to a problem of his/her interest.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

CS 4364. Topics in Data Science.
Introduction to advanced concepts and algorithms in data science and their applications. Topics may include deep learning, speech processing, language processing, data integration, information retrieval, and information visualization. May be repeated for credit when topic varies.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

Topics in Soft Computing (3-0) Introduction to basic concepts and techniques of soft computing, including neural, fuzzy, evolutionary, and interval computations, and their applications. This course may be repeated for credit when topic varies. Restricted to majors: CS, EE, and EECE. Prerequisites: MATH CS 2302 w/a grade of C or better.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)

Computer Science Problems (0-0-3) Original investigation of special problems selected by the student in consultation with the instructor and with the permission of the Chairperson of the Computer Science Department. May be repeated for credit. Major Restriction: CS Prerequisites: Senior standing in Computer Science and department approval
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
0 Lecture Hours
3 Other Hours
CS 4373. Computer Science Internship.
A professional internship in an industrial, governmental, or other organization in which a student engages in authentic workplace experiences. To receive a passing grade, the student must submit a written report from the internship supervisor to the undergraduate program director that presents the results of the internship, including a description of applied and acquired skills. Prerequisites: CS 3331 w/a grade of C or better AND departmental approval. Restricted to Major of CS.
Department: Computer Science
3 Credit Hours
20 Total Contact Hours
0 Lab Hours
0 Lecture Hours
20 Other Hours
Major Restrictions:
Restricted to majors of CS
Prerequisite(s): (CS 3331 w/C or better)

CS 4374. Software Construction.
Survey of professional software construction techniques and practices including agile development, software tools and environments, configuration management, defect tracking, coding style, coding standards, cross-compilation, techniques for optimization (time, space, and I/O bandwidth), refactoring, software maintenance, and software development automation. Provides an integrated view of subjects related to the different phases of software development. Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 3331 w/C or better)

Process and thread management, processor scheduling and concurrency, interprocess communication, memory management, input/output management, file systems, and networking basics Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 3432 w/C or better)

CS 4376. Comp Dcsn-Mkng & Risk Analysis.
The course covers a variety of mathematical and computational techniques for modeling and analyzing security problems; fundamentals of mathematical approaches for analyzing risk, decision-making under uncertainty, adversarial reasoning, extracting patterns from data for modeling and analysis; and methods to analyze security problems in rigorous ways. The course includes case studies and examples related to security to illustrate techniques and contemporary issues in cyber security. Prerequisites: CS 2302 with a grade of C or better. Restricted to Majors of CS.
Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Major Restrictions:
Restricted to majors of CS
Prerequisite(s): (MATH 2300 w/C or better ) OR (CS 2202 w/C or better ) AND (CS 2302 w/C or better)
The course explores a variety of topics associated with the cyber-security of operational technology supporting critical sectors as defined by the U.S Department of Homeland Security. The course provides hands-on experience on the construction and configuration of cyber-infrastructures to secure critical operational technology components such as Programmable Logic Controllers (PLC). Students work in teams to simulate an operational technology component using off-the-shelf hardware and software, and develop a secure cyber-infrastructure to prevent the component from being compromised. Prerequisites: CS 3331 with a grade of C or better. Restricted to Majors of CS.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

CS 4379. Software Reverse Engineering.
The course focuses on incorporating security technologies and methods into new and existing systems; using reverse engineering techniques and methodologies to explore the internal operations of compiled, executable machine code to identify possible security vulnerabilities and examine ways attackers can expose such vulnerabilities; analyzing threats; applying methods to prevent and defeat attacks; and understanding the ethical responsibilities and obligations associated with developing, acquiring, and operating software systems.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 3432 w/C or better)

CS 4381. Topics Software Engineering.
Topics Software Engineering Topics related to techniques, methods, approaches, and paradigms in software engineering. Example topics include agile development, aspect-oriented development, formal methods, and model-driven development. May be repeated for credit when topic varies.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
Prerequisite(s): (CS 3331 w/C or better)

CS 4387. Software Integration and V&V.
The course covers the principles and processes of validation, verification, and integration within a disciplined software development environment. Topics include efficient integration of software systems or components that meet customer requirements and needs; disciplined approaches for integration and testing throughout the development life cycle, selection of alternative methods for integration and testing, and fault diagnosis; use of static and dynamic testing techniques and tools to identify code vulnerabilities; testing based on attack patterns; and penetration testing. Prerequisites: CS 3331 with a grade of C or better. Restricted to Majors of CS.

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Major Restrictions:
Restricted to majors of CS
Prerequisite(s): (CS 3331 w/C or better)

CS 4390. Special Topics in Computer Sci.
Special Topics in Computer Science (3-0) Selected topics of current interest in computer science. May be repeated for credit when topic varies. Major Restriction: CS Prerequisites: Senior standing in computer science and department approval

Department: Computer Science
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours
CS 4392. Rsrch Methods/Computer Science.
Research Methods in Computer Science (3-0) An advanced course in the skills needed for research in Computer Science, including a survey of the various research paradigms and experimental protocols used across the field. Within a particular research area of the student's choice, a student will learn to: judge whether a question is a research question; design an appropriate experiment to answer a research question; interpret the results of an experiment, including selection and application of appropriate statistical tests; present and defend their research orally and in writing.

Department: Computer Science

3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

CS 4393. Senior Project.
Senior Project (0-0-3) Research and analysis leading to a new publishable theoretical result or a new useful sophisticated piece of software. Includes formal project proposal, generation of a well-documented report, and a presentation of the results to faculty and students. Intended to allow advanced undergraduate students to actively and productively participate in research. A research topic must be selected by the student in consultation with the instructor and with the permission of the Head of Computer Science. Prerequisite: Department approval.
