Prerequisite(s): (TSIM score between 336 and 349) OR (2TDM score between 1 and 4 AND 2TSM score between 910 and 949)

MATH 0311. Intermediate Algebra.
This course begins with a review of polynomials. Major topics include rational expressions and equations, radical expressions, rational exponents, complex numbers, quadratic equations, graphing lines, and geometry. The Course is designed as an introduction to MATH 1508 or 1320. Credit hours received for MATH 0311 may count toward removal of provisional status, but may not be used to satisfy any institutional degree requirements. Prerequisite: MATH 0310 with a "C" or better or placement by examination.

Prerequisite(s): (NCBM M020 w/S* or better) OR (NCBM M021 w/S* or better) OR (TSIM score between 336 and 349) OR (NCBM M031 w/S* or better) OR (TABM score between 5 and 6 AND TSIM score between 310 and 335)

MATH 0312. Intermediate Algebra Co-Req.
Intermediate Algebra Co-Req This course will provide college-level course specific (MATH 1320 or MATH 1508) foundational content to include: Define, represent, and perform operations on real and complex numbers. Recognize, understand, and analyze features of a function. Recognize and use algebraic properties, concepts, procedures (including factoring), and algorithms to combine, transform, and evaluate absolute value, polynomial, radical, rational expressions. Indentify and solve absolute value, polynomial, radical and exponential equations.

MATH 3300. History of Mathematics.
History of Mathematics: One of two periods will be covered: 1) Pre-17th century history: Mathematical contributions of various cultures and eras from ancient Babylonia to 16th century Europe are reviewed with special focus on Greek mathematics. The history is viewed through the problems of the various epics studied. 2) Early modern history: A historical account of the genesis of trigonometry, logarithms, analytical geometry, calculus, and the study of functions, with an emphasis on the period of the European scientific revolution (1600-1750). Original works by noted mathematicians will be examined in order to understand the evolution of our current mathematics curriculum. May be repeated for credit when the periods differ.
