**MATH 0120. Lab for Math 1320.**

Lab for Math 1320 (0-2) A lab to support learning of the mathematical concepts, problem solving and mathematical writing skills encountered in MATH 1320. Credit hours received for MATH 0120 may not be used to satisfy any institutional degree requirements. Concurrent enrollment in MATH 1320 required.

1 Credit Hour
2 Total Contact Hour
2 Lab Hour
0 Lecture Hour
0 Other Hour

**Prerequisite(s):** (BANM score of 2 ) OR (ACCL score between 000 and 120 ) OR (EPCM score between 000 and 120 ) OR (MAPM score between 613 and 725 ) OR (MATE score between 26 and 48)

**MATH 0311. Intermediate Algebra.**

This course begins with a review of polynomials. Major topics include rational expressions and equations, radical expressions, rational exponents, complex numbers, quadratic equations, graphing lines, and geometry. The Course is designed as an introduction to MATH 1508 or 1320. Credit hours received for MATH 0311 may count toward removal of provisional status, buy may not be used to satisfy any institutional degree requirements.

3 Credit Hours

**Prerequisite(s):** (MATH 0310 w/C* or better ) OR (MATH 0311 w/C or better ) OR (MATH 1319 w/C or better ) OR (MATH 1320 w/C or better ) OR (MATH 1508 w/C or better ) OR (MATH 1511 w/C or better ) OR (MATH 1512 w/C or better ) OR (MATH 2313 w/C or better ) OR (MATH 2326 w/C or better ) OR (MATH 2301 w/C or better ) OR (BANM score between 2 and 5 ) OR (ACCL score between 000 and 120 AND BANM score between 2 and 5 ) OR (BANM score between 2 and 5 AND EPCM score between 000 and 120 ) OR (BANM score between 2 and 5 AND MAPM score between 613 and 725 ) OR (BANM score between 2 and 5 AND MATE score between 26 and 48 ) OR (MATH 0310 w/S* or better ) OR (MATH 0311 w/S* or better ) OR (BANM score between 2 and 5 AND TAKM score between 2200 and 2821 ) OR (MATH 1411A w/C or better AND MATH 1411B w/C or better AND MATH 1411C w/C or better ) OR (MATH 1508A w/C or better AND MATH 1508B w/C or better AND MATH 1508C w/C or better ) OR (MDM1 score of Y ) OR (NCBM M020 w/S* or better ) OR (NCBM M021 w/S* or better ) OR (TISIM score between 336 and 349 ) OR (NCBM M031 w/S* or better ) OR (TABM score between 5 and 6 AND TISIM score between 310 and 335 ) OR (SXDG score of 1 ) OR (SXMA score of 1 ) OR (SXMN score of 1 ) OR (SXI score of 1 ) OR (SXTR score of 1)

**MATH 0312. Intermediate Algebra Co-Req.**

Intermediate Algebra Co-Req This course will provide college-level course specific (Math 1320 or Math 1508) foundational content to include: Define, represent, and perform operations on real and complex numbers. Recognize, understand, and analyze features of a function. Recognize and use algebraic properties, concepts, procedures (including factoring), and algorithms to combine, transform, and evaluate absolute value, polynomial, radical, rational expressions. Indentify and solve absolute value, polynomial, radical and exponential equations.

**Corequisite(s):** MATH1320
MATH 0313. College Algebra CoReq.
This course will provide college-level course specific foundational content to include: Rectangular Coordinates, Graphs and Linear Equations in Two Variables, Analyzing Graphs of Functions, Transformation, Combinations, Inverse and Quadratic Function Models, Polynomial and Synthetic Division, Complex Numbers, Zeros of Polynomial Functions, Rational and Exponential Functions and Graphs, Logarithmic Functions and Graphs, Properties of Logarithms, Exponential and Logarithmic Equations and Models, Linear and Non-Linear Systems of Equations, Linear Systems, Partial Fractions, and Matrices.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Corequisite(s): MATH1309

MATH 1309. College Algebra.
The content of the entire course covers topics from basic mathematics and develop them using practical and theoretical tools, building applications and making a strong support for Calculus classes. As student passing Math 1309 College Algebra will be able to work with the concepts of functions (functions in general, exponential and logarithmic functions, polynomial and rational functions), to solve a system of linear and non-linear equations and inequalities, to make basic operations with matrices and apply mathematical induction method.
3 Credit Hours
3 Total Contact Hours
0 Lab Hours
3 Lecture Hours
0 Other Hours

Corequisite(s): MATH0313

MATH 1310. Trigonometry and Conics.
The content of the entire course covers topics from basic mathematics and develop them using practical and theoretical tools, building applications and making a strong support for Calculus classes. A student passing Math 1310 Trigonometry and Conics course will be able to work with the concepts of trigonometric functions and their properties, and to apply them in problems related to other branches of Science: Calculus, Algebra, Physics, Chemistry, Biology, Pharmacy, Engineering, Statistics, etc. To work with conics (Parabola, Ellipses, and Hyperbolas), conic rotations, parametric equations.

Mathematics Courses

MATH 1508. Precalculus.
Precalculus (5-0) (Common Course Number MATH 2412) Topics include the algebraic manipulation and graphical representation of the following classes of real functions: linear, polynomial, rational, exponential, logarithmic, and trigonometric. Inverse functions, triangle trigonometry, complex numbers, and polar coordinates are included. Prequisite: MATH 0311 or an acceptable score on a placement examination.

MATH 1508C. Pre-calculus - Part C.
Pre-calculus - Part C (1.667-0) The course covers trigonometric functions and the unit circle, their inverses, graphs, and applications. It covers right triangle trigonometry, verifying trigonometric identities, solving trigonometric equations, sum and difference formulas, multiple angle and product-to-sum formulas, as well as the Law of Sines, and the Law of Cosines. This is Part-of-Term course and will be offered three times every fall and spring semester, once during each summer session, current intersession semesters.

MATH 2303. Number Concepts.
This course focuses on numbers and operations for prospective elementary and middle school teachers. Topics include place value, whole numbers, rational numbers, signed numbers, arithmetic operations and algorithms, divisibility tests, multiples and factors. The focus is on conceptual understanding, quantitative reasoning, number sense, multiple representations and ways of thinking, mathematical justification and communication, problem solving, connection making and addressing students’ common misconceptions and errors.

MATH 2304. Geometry & Measurement.
This course focuses on geometry and measurement for prospective elementary and middle school teachers. Topics include measurement as a process of units of measurement for quantities such as length, area, volume, angle size, and speed; conversions of units of measurement; properties and formulas for basic geometrical shapes such as polygons, circles, polyhedra, and cones; transformations such as translations, rotations, reflections, and dilations to geometric relationships and constructions using straight edge, compass, and technology. The focus is on spatial reasoning, logical reasoning, and making connections among geometric ideas and measurement, number concepts, and algebra.

Prerequisite(s): (MATH 1312 w/C or better) OR (MATH 2313 w/C or better)

MATH 3300. History of Mathematics.
History of Mathematics (3-0) One of two periods will be covered: 1) Pre-17th century history: Mathematical contributions of various cultures and eras from ancient Babylonia to 16th century Europe are reviewed with special focus on Greek mathematics. The history is viewed through the problems of the various epics studied. 2) Early modern history: A historical account of the genesis of trigonometry, logarithms, analytical geometry, calculus, and the study of functions, with an emphasis on the period of the European scientific revolution (1600-1750). Original works by noted mathematicians will be examined in order to understand the evolution of our current mathematics curriculum. May be repeated for credit when the periods differ.

MATH 3305. Proportion and Algebra.
This course focuses on proportional and algebraic reasoning for prospective elementary teachers. Topics include ratios as measures, ratios as multiplicative comparisons, proportions, rates of change, patterns, linear functions and solving linear equations, inequalities and systems. The focus is on identifying relationships between quantities in contextualized problems, using inductive reasoning to identify patterns and express them algebraically making connections among verbal, graphic, numeric and symbolic representations, solving problems, using concrete numeric, tabular, graphic and algebraic methods, and addressing student's misconceptions and errors.
