Ph.D. in Materials Science and Engineering (MASE) (Interdisciplinary)

The field of materials science and engineering is central to the technological, industrial, and economic development of Texas, the United States, Mexico, and other industrialized countries. The UTEP PhD program MASE is a multi-disciplinary program to prepare scientists and engineers to contribute to this vital field, with a range of skills linking structure, properties, synthesis and processing, and performance of materials. Students develop a research focus in a specialized area using one or more of these skills to study some class or classes of materials, including metals, polymers, ceramics, semiconductors, superconductors, composites, and other materials systems.

Admission Requirements

Admission to the PhD program in materials science and engineering with a BS or MS degree in a related field (Physics, Chemistry, Electrical and/or Electronic Engineering, etc.) from an ABET accredited institution in the United States, or proof of equivalent education from an international institution, requires a minimum 3.0 GPA. Program requires minimum English Language proficiency. The current requirements can be found under Admissions in the Graduate School website. Specific admission requirements for the Ph.D. Program in Materials Science and Engineering are described below.

1. Undergraduate or graduate degree in Materials Science and Engineering or a related field from an ABET accredited institution in the United States, or proof of equivalent education from an international institution.
2. Demonstration of academic achievement and potential as indicated by the results of the Graduate Record Examination (GRE), and upper-level undergraduate and graduate coursework. The GRE requirement is waived for students from UTEP.
3. Three letters of recommendation.
4. A written statement of intent, describing applicant’s career goals and describing their vision of the path to those goals (including a summary of previous preparation and applicant's expectations from the graduate program).
5. Submission of a CV/resume summarizing professional and academic experience and any other evidence of background, knowledge, research, or work experience in Materials Science and Engineering that may be relevant.
6. Applicants from countries where English is not the first language are required to demonstrate English proficiency. Please consult the graduate school (http://catalog.utep.edu/admissions/graduate/graduate-student/) website for required scores.

Background required for Ph.D. in MASE Degree

Students should have a background in the following courses or equivalent: MME 3308 Appl Chemical Thermodynamics, MME 3406 Nanofuctnl Physical Metallurgy, MME 3306 Rate Processes, and MME 3407 Mechanical Behavior of Matls. If the student does not have the required background, the students are required to complete these courses.

The UTEP MASE program currently does not offer a terminal master’s degree.

Students are required to pass an oral Qualifying Examination (Dissertation Proposal Defense) administered by their Research Committee. This qualifying examination consists of defending a written dissertation proposal and answering questions of either a broad or specific nature in relationship to their dissertation research project. This examination is usually administered after a minimum of two semesters of work. Students cannot register for dissertation credits until after the Qualifier Examination has been successfully passed. Students can enroll in appropriate graduate research projects or independent study courses prior to passing the examination.

Students are required to submit at least one paper as first author along with the research advisor (if applicable to include research advisor) to a peer-reviewed journal. The paper must be submitted before the student can schedule their dissertation proposal. At the conclusion of the research program, the student will make a public presentation of the dissertation and submit a dissertation document. The format requirements of the dissertation document can be found on the graduate school website. This will also constitute a Final Oral Examination or Dissertation Defense with questions from both the Dissertation Committee and the general public.

Degree Requirements

A minimum of 74 credit hours are required to satisfy the MASE Ph.D. Program requirements. All students who enter the MASE Ph.D Program are required to take 17 credit hours of core courses. Students who enter with an MS degree in Materials Science and Engineering or a related field (Physics, Chemistry, Electrical and/or Electronic Engineering, etc.) can receive up to 30 credit hours towards the MASE Ph.D. Degree requirements. The remaining course credits can be made up with MASE electives or graduate research/independent study courses for a total of 21 credits. Students entering with a BS degree will be required to complete 21 credit hours of elective courses and 30 credit Remedial Courses: Do not count towards the degree requirements

hours of MASE elective or graduate research/independent study courses. The student is allowed to enroll in up to six (6) credit hours of approved coursework in areas outside the Materials Science and Engineering (MASE) Program, pending approval from the Graduate Advisor. The core and elective courses (discussed below) are traditional lecture or seminar courses. The student will take a minimum of six (6) credit hours of Doctoral Dissertation. All courses require a grade of C or better and a minimum GPA of 3.0 is required for graduation.

**Degree Plan**

Two options are available for students: Entering with a M.S. degree or entering with a B.S. degree.
