

# Graduate Certificate in Healthcare Administration

Graduate Certificate in Health Services Administration equips graduates for successful careers in healthcare management. The certificate program combines theoretical knowledge with practical applications, focusing on essential management principles relevant to today's healthcare environment. Through a blend of coursework and hands-on experiences, students gain the skills needed to excel in diverse healthcare settings. Some objectives include:

- Graduate will understand essential healthcare principles and practices.
- Students will develop key skills in leadership, communication, and management for effective agency oversight.
- Participants will gain practical knowledge of information systems that enhance operational efficiency.
- Graduates will understand the economic and financial frameworks common in health services organizations.

**Additional Relevant Information:** Please note that current or prospective MPH students are not eligible to enroll in the courses listed under PUBH due to accreditation requirements.
