

BA in Computer Science

The proposed BACS program has been designed to meet the Texas Core Curriculum. The program is designed to prepare students with foundational mathematical and computing knowledge to allow them to tackle challenges of the future. The program allows students to use knowledge of computer science including algorithms, problem solving, and programming to build solutions in a variety of disciplines. Additionally, the new degree will allow students to establish a focus area from other disciplines in education, health science, liberal arts, engineering, science, and business.

Educational Objectives

The program's educational objectives of the proposed degree focus on preparing graduates who will be able to:

1. Be innovative and productive problem-solvers in industry, academia, and government who have the ability to apply theoretical computing knowledge to provide solutions to real-world problems,
2. Contribute to the economic health of the nation, in particular the Paso del Norte region, through technical computing expertise and complementary skills including working with and leading interdisciplinary teams with a global perspective, and
3. Remain at the forefront of technology through research, advanced studies, certification, entrepreneurship, or other means of self-advancement.

Marketable Skills

Graduates of the BACS will have software development principles, mathematical algorithms, and programming skills to:

- Develop new software systems in a variety of domains
- Define computational principles
- Work with mathematical models, data analysis, and security
- Design and analyze algorithms to solve programs
- Study the performance of computer hardware and software

Courses offered by the CS department, particularly those contributing to the BACS degree, allow students to participate in the following EDGE experiences:

- Community engagement through course projects,
- Student employment as Teaching/Research Assistants,
- Student Leadership through student organizations,
- Internship (with possibility to earn course credit), and
- Research and Scholarly activities through enrollment in CS4371 (Computer Science Problems) course.

The BACS students must satisfy all university core requirements and complete all required courses and program requirements. Students must have a cumulative university GPA of at least 2.0 and a cumulative CS GPA of at least 2.0 and have neither missing nor outstanding "I" or "W" grades.
