BS in Industrial and Systems Engineering

The Industrial and Systems Engineering Curriculum is designed for students who desire to enter industry or pursue advanced studies. The curriculum provides a broad range of courses in the areas of human interface design and management, plant design, operations research, production and inventory control and quality control.

Marketable Skills

Students will develop the following marketable skills:

1. Critical thinking: Analyze and evaluate issues in order to solve problems and develop informed opinions
2. Decision Making
3. Problem-solving: Find solutions to difficult or complex issues
4. Research: Be able to search, investigate and critically analyze information in response to a specific research question

Vision

The Industrial and Systems Engineering program strives to graduate industrial engineers of the highest quality and to conduct state-of-the-art research for the end-to-end enterprise.

Mission

The Industrial and Systems Engineering program makes available a high quality, relevant engineering education available to all residents of the El Paso bi-national region. The department dedicates itself to providing Indicates Texas Common Course Number (TCCN) students with a set of skills, knowledge and attitudes that will permit its graduates to succeed and thrive as engineers and leaders.

Program Educational Objectives

The Industrial and Systems Engineering program produces diverse and exceptional graduates who within a few years after graduation will:

- Gain successful employment in a competitive global marketplace in leadership positions.
- Engage and be successful in graduate studies and/or professional training programs

Student Outcomes

The Bachelor of Science in Industrial and Systems Engineering (BSISE) program has seven student outcomes that we expect our students to achieve at the time of graduation. These student outcomes support the BSISE program educational objectives. Attainment of these outcomes prepares graduates to enter the professional practice of engineering. The student outcomes are:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Fast Track

The Fast-Track Program (http://catalog.utep.edu/admissions/undergraduate/fast-track/#text) enables outstanding undergraduate UTEP students to receive both undergraduate and graduate credit for up to 15 hours of UTEP course work as determined by participating Master's and Doctoral programs. Not all undergraduate programs have elected to participate in the Fast Track option, so students should see their departmental graduate advisor for information about requirements and guidelines. A list of courses that have been approved for possible use at the graduate level is found here (http://catalog.utep.edu/admissions/undergraduate/fast-track/#fasttrackcoursestext).

Fast-Track Combined BSISE/Master Program in Industrial, Manufacturing, or Systems Engineering

Students with at least 90 hours accumulated toward their BSISE degree and a cumulative GPA of at least 3.30 may be eligible for admission into the fast-track BSISE/Master Program. Students admitted to this program take graduate classes that count both toward graduate degree requirements and undergraduate degree requirements, for up to 9 credit hours of IE, MFG, or SE graduate courses per approval of the undergraduate and graduate advisors. Eligible IE, MFG, or SE graduate courses come from a list approved for fast-track by the IMSE Faculty. Students must earn a B or better in

the graduate course to count as graduate credit for the Master of Science in Industrial Engineering, Master of Science in Manufacturing Engineering, or for the Master of Science in Systems Engineering. If the grade is a C, it will not count towards the graduate degree but will still count towards the undergraduate degree.

C Courses require a grade of C or better.

I. Communication (six hours)

Code	Title	Hours
Courses in this category focus on developing ideas and expressing them clearly, considering the effect of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience.		
Select six hours of the following:		6
For students whose secondary education was in English:		
COMM 1611	Written and Oral Communication	
ENGL 1313	Writing About Literature	
RWS 1301	Rhetoric & Composition I	
RWS 1302	Rhetoric & Composition 2	
RWS 1601	Rhetoric, Composition & Comm	
For students whose secondary education was not in English:		
ESOL 1311	Expos Engl Compos-Spkr Esl	
ESOL 1312	Res & Crit Writng Spkr Esl	
TOTAL HOURS		**6**

II. American History (six hours)

Code	Title	Hours
Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role.		
HIST 1301	History of U.S. to 1865	3
HIST 1302	History of U.S. Since 1865	3
TOTAL HOURS		**6**

III. Language, Philosophy & Culture (three hours)

Code	Title	Hours
Courses in this category focus on how ideas, values, beliefs, and other aspects of culture express and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures.
