BS in Metallurgical and Materials Engineering

The success of our students in their education at UTEP and in building and sustaining a career is our primary interest. Graduates in metallurgical and materials engineering often pursue careers in industries such as oil & gas, R&D, aerospace, primary metals, and biomedical components. The job functions of our engineers include failure analysis, product development, quality assurance, and production management.

Marketable Skills

Students will develop the following marketable skills:

1. Communication: Reach mutual understanding through effective exchange of information, ideas, and feelings
2. Critical thinking: Analyze and evaluate issues in order to solve problems and develop informed opinions
3. Leadership: Step up, think, and act critically and creatively to bring others together to accomplish a common task
4. Network building: Project-based learning, tours and formal interactions with industry partners
5. Problem-solving: Find solutions to difficult or complex issues
6. Research: Be able to search, investigate and critically analyze information in response to a specific research question
7. Teamwork: Participate as an effective, efficient member of a group in order to meet a common goal
8. Technical expertise: Hands-on experience with testing and analysis equipment

The Metallurgical and Materials Engineering undergraduate curriculum focuses on a strong materials science and engineering foundation, a deep understanding of how materials are processed, and how to tailor materials structure and properties to satisfy industrial needs and performance requirements. Students may choose a concentration in forensic engineering and materials performance, extractive and process metallurgy or biomaterials.

Vision

Our vision is to provide a modern Metallurgical and Materials Engineering Program of the highest quality.

Mission

The BS degree program in Metallurgical and Materials Engineering (MME) will serve two broad purposes: (1) to provide sufficient theory and hands-on experiences in metallurgical and materials engineering for a graduate to perform effectively, in industry or other employment; and (2) to provide opportunities for all types of students, while maintaining a high level of excellence as students progress through the curriculum. The MME program will also provide basic engineering skills for problem-solving and lifelong learning, along with good communication skills, both oral and written. MME faculty will maintain a balance between the applied and theoretical aspects, and will strive to provide pre-professional employment opportunities (either research experiences or internships) by continuously engaging industry in program activities with students.

Educational Objectives

1. Graduates will secure employment and/or admission to a graduate program in metallurgical and materials engineering or related professions
2. Graduates will advance in their career by continuing lifelong learning and personal/professional development
3. Graduates work effectively as contributors and leaders on diverse, interdisciplinary teams enabling innovation at the leading edge of technology in an ever-changing global community.
4. Graduates will be more competitive as practicing professionals with broad understanding of material systems, associated manufacturing processes and engineering solutions.

The Metallurgical and Materials Engineering (MME) program offers a Bachelor of Science MME degree with an option to develop an expertise in one of the four concentrations. If a student does not select a concentration, they are required to complete 4 elective courses (12 credit hours) from the list of all MME electives to satisfy the requirements for the BS MME degree.

- Concentration 1: Forensic Engineering and Materials Performance
- Concentration 2: Extractive and Process Metallurgy
- Concentration 3: Biomaterials
- Concentration 4: General Metallurgical and Materials Engineering

Fast Track

The Fast-Track Program (http://catalog.utep.edu/admissions/undergraduate/fast-track/#text) enables outstanding undergraduate UTEP students to receive both undergraduate and graduate credit for up to 15 hours of UTEP course work as determined by participating Master's and Doctoral programs. Not all undergraduate programs have elected to participate in the Fast Track option, so students should see their departmental graduate advisor for

information about requirements and guidelines. A list of courses that have been approved for possible use at the graduate level is found here (http://catalog.utep.edu/admissions/undergraduate/fast-track/#fasttrackcoursestext).

UTEP senior students with at least 90 hours accumulated toward their BSMME degree, a minimum of 24 of those hours at UTEP and a cumulative GPA of at least 3.30 may be eligible for admission into the following fast-track programs:

- BS-MME/Master Program in Metallurgical and Materials Engineering (MS-MME)
- BS-MME/Master Program in Biomedical Engineering (MS-BME)

Students admitted to these programs take graduate classes that count both toward graduate degree requirements and undergraduate degree requirements, for up to 15 credit hours of graduate courses per approval of the undergraduate and graduate advisors.

Eligible graduate courses come from a list approved for fast-track by the Metallurgical, Materials and Biomedical Engineering (MMBME) Faculty.

Students must earn a B or better in the graduate course to count as graduate credit for the Master of Science in Metallurgical and Materials Engineering or for the Master of Science in Biomedical Engineering. If the grade is a C, it will not count towards the graduate degree but will still count towards the undergraduate degree.

Additional program requirements can be found here. (https://www.utep.edu/graduate/future-students/fast-track2.html#anchor1)

Concentrations

Forensic Engineering and Materials Performance

Code	Title	Hours
BSMME- Forensic Engineering and Materials Performance		
Choice of 4 courses from the following:		
MME 4315	Metallogrphy and Micro Inter [*c]	3
MME 4317	Advanced Failure Analysis	3
MME 4331	Non-Destructive Examination [c]	3
MME 4332	Root Cause Analysis [c]	3
MME 4333	Fracture Mechanics [c]	3
MME 4334	Biomed Product Performance [c]	3
MME 4335	Functional Failure Analysis [c]	3
MME 4390	Special Topics in MME [c]	3

* Required Courses.
C Courses require a grade of C or better.

Extractive and Process Metallurgy

Code	Title	Hours
BSMME- Extractive Metallurgy		
Choice of 4 courses from the following:		
MME 4315	Metallogrphy and Micro Inter [*c]	3
MME 4340	Mineral Processing [c]	3
MME 4341	Recycling Processes [c]	3
MME 4342	Hydrometallurgy [*c]	3

University Core Curriculum

The department may make specific suggestions for courses which are most applicable towards your major.

All courses require a C or better

I. Communication (six hours)

Code	Title	Hours
Courses in this category focus on developing ideas and expressing them clearly, considering the effect of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience.		
Select six hours of the following:		6
For students whose secondary education was in English:		
COMM 1611	Written and Oral Communication	
ENGL 1313	Writing About Literature	
RWS 1301	Rhetoric & Composition I	
RWS 1302	Rhetoric & Composition 2	
RWS 1601	Rhetoric, Composition & Comm	
For students whose secondary education was not in English:		
ESOL 1311	Expos Engl Compos-Spkr Esl	
ESOL 1312	Res & Crit Writng Spkr Esl	
Total Hours		**6**

II. American History (six hours)

Code	Title	Hours
Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role.		
HIST 1301	History of U.S. to 1865	3
HIST 1302	History of U.S. Since 1865	3
Total Hours		**6**

III. Language, Philosophy & Culture (three hours)

Code	Title	Hours
Courses in this category focus on how ideas, values, beliefs, and other aspects of culture express and affect human experience. Courses involve the exploration of ideas that foster aesthetic and intellectual creation in order to understand the human condition across cultures.		
Select one of the following:		3
AFST 2300	Intro-African Amer Studies	
CHIC 2302	Latina/o Presence in the U.S.	
ENGL 2311	English Literature	
ENGL 2312	English Literature	
ENGL 2313	Intro to American Fiction	
ENGL 2314	Intro to American Drama	
ENGL 2318	Intro to American Poetry	
FREN 2322	Making of the "Other" Americas	
HIST 2301	World History to 1500	
HIST 2302	World History Since 1500	
PHIL 1301	Introduction to Philosophy	
PHIL 2306	Ethics	
RS 1301	Introduct to Religious Studies	
SPAN 2340	Seeing & Naming: Conversations	
WS 2300	Introduction to Womens Studies	
WS 2350	Global Feminisms	
Total Hours		**3**

IV. Mathematics (three hours)

Code	Title	Hours
Courses in this category focus on quantitative literacy in logic, patterns, and relationships. Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experience.		
Select one of the following:		3
MATH 1309	College Algebra	
MATH 1310	Trigonometry and Conics	
MATH 1319	Math in the Modern World	
MATH 1320	Math for Social Sciences I	
MATH 1411	Calculus I	
MATH 1508	Precalculus [1,2]	
MATH 2301	Math for Social Sciences II	
STAT 1380	Statistical Literacy	
STAT 2480	Elementary Statistical Methods	
1 A higher-level course in the calculus sequence can be substituted.		
2 TCCN MATH 1314 will also satisfy this requirement.		
Total Hours		**3**

V. Life & Physical Sciences (six hours)

Code	Title	Hours
Courses in this category focus on describing, explaining, and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on experiences.		
Select one of the following:		1-4
ASTR 1107	Astronomy Lab I	
ASTR 1307	Elem Astronomy-Solar System

VI. Political Science (six hours)

Code	Title	Hours
Courses in this category focus on consideration of the Constitution of the United States and the constitutions of the states, with special emphasis on that of Texas. Courses involve the analysis of governmental institutions, political behavior, civic engagement, and their political and philosophical foundations.		
Required Courses:		
POLS 2310	Introduction to Politics	3
POLS 2311	American Gover & Politics	3
Total Hours		**6**

VII. Social and Behavioral Sciences (three hours)

Code	Title	Hours
Courses in this category focus on the application of empirical and scientific methods that contribute to the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions, and events, examining their impact on the individual, society, and culture.
