

Minor in Global Health

The purpose of the Global Health Minor is to provide students a foundational knowledge to operate as global citizens and to equip them with a comprehensive understanding about the complexities and realities of global health. Students will be able to:

- synthesize knowledge of current global health issues;
- learn about best practices in global health;
- develop strategies to improve health outcomes in low resource countries;
- prepare for internationally focused careers in government agencies, non-governmental organization, immigrant health agencies, philanthropic foundations and international health organizations.
