Finance Courses

Courses

FIN 2350. Managing Entrepreneur Finance.
Managing Entrepreneurial Finance (3-0) This course develops basic financial management concepts and applies them to the start-up, operation, expansion, and sale of small business firms. The principles of accounting, economics, finance, and management will be combined to provide the student with the essentials for obtaining and managing the finances of a small business. Completion of this course will prepare future entrepreneurs with the skills required to successfully manage the financial challenges of a small company. The teaching approach will combine lecturers, case studies, presentations by regional practitioners, and classroom discussion. This course is a core course in the Entrepreneurship Certification Program.

Restricted to majors of ACCT, BSAD, CIS, ECON, FIN, GENB, INBU, INFS, IS, ISBA, MGMT, MKT, OSCM

**Prerequisite(s):** (FIN 3310 w/C or better)

**Corequisite(s):** FIN 4310

FIN 4312. Current Issues in Banking.
Current Issues in Banking (3-0) An analysis of current problems in commercial banking from the points of view of the banks, their regulators, and the public. Restricted to majors: ACCT, BSAD, CIS, ECON, FIN, MGMT, and MKT. Prerequisite: FIN 4311 or department approval.

**Department:** Finance  
**3 Credit Hours**  
**3 Total Contact Hours**  
0 Lab Hours  
3 Lecture Hours  
0 Other Hours  

**Major Restrictions:**  
Restricted to majors of ACCT, BAMA, BSAD, CIS, ECON, FIN, GENB, INFS, IS, ISBA, MGMT, MKT, OSCM

**Prerequisite(s):** (FIN 4311 w/C or better)
FIN 4315. Portfolio Analysis.
This course is based on modern portfolio analysis techniques. It utilizes mean-variance analysis to determine efficient portfolios and presents techniques for calculating efficient frontiers. It also utilizes single and multi-index models to calculate the correlation structure of security returns and simplify the portfolio selection process. It further examines models of equilibrium in capital markets, international diversification and other portfolio selection models, such as safety-first. The course will utilize the computer to demonstrate and explore the various implications of portfolio analysis. Prerequisite: FIN 3315, minimum grade of C.

Prerequisite(s): (FIN 3315 w/C or better)
FIN 4318. Fin Anal of Firm & Valuation.
Financial Analysis of the Firm and its Valuation: An advanced inquiry into the techniques of analysis of the firm’s book and market values, and new investments. The analysis of book value based on historical performance concentrates on the techniques of analysis of the firm’s accounting financial statements as an aid to extraction and evaluation of information for interpretation and decision-making by lenders, investors, and others. The analysis of market value based on expected performance concentrates on the fundamental techniques of analysis of the firm’s bonds and stocks, inclusive of their pricing theorems, reinvestment rate assumptions, effects on price-earnings multipliers, and implications of the valuation of the firm’s growth rate. Finally, the analysis of new investments on the firm’s market value concentrates on the capital budgeting process, inclusive of cash flows, risk, and capital costs.

Prerequisite(s): (FIN 3310 w/C or better)
FIN 4340. Actuarial Finance.
Actuarial Finance This course presents a unified approach to both financial and actuarial modeling through the use of general status structures. It defines future time-dependent financial actions in terms of a status structure that may be either deterministic or stochastic. The course also shows how deterministic status structures lead to classical interest and annuity models, investment pricing models, and aggregate claim models. Finally, it employs stochastic status structures to develop financial and actuarial models, such as surplus models, life insurance, and life annuity models.
